

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the description of the data which is described in the previous chapter, it can be concluded as follow:

1. There was positive correlation between students' motivation in learning English and their speaking fluency at MAN 1 Pekanbaru. It means that the increasing of students' motivation in learning English is followed by the increasing of students' speaking fluency, on the contrary the decreasing of students' motivation in learning English is followed by the decreasing of students' speaking fluency..
2. There was a significant correlation between students' motivation in learning English and their speaking fluency at MAN 1 Pekanbaru. It could be seen from the value of pearson product moment correlation and Sig. (2-tailed). The value of pearson product moment correlation or  $t_{\text{observed}}$  was higher than the value of  $t_{\text{table}}$  at significant level 5% and 1%, then it could be stated  $0.325 < 0.555 > 0.418$ . It is also could be seen from the value of Sig. (2-tailed), it is lower than 0.05 ( $0.001 < 0.05$ ). So it is satisfied into high category.

## **B. Suggestion**

### **1. Suggestion for the Teacher**

The suggestion the writer would give to the English teachers is that, they are expected to improve their students' motivation in learning English, because motivated students will concentrate and enjoy the teaching and learning process. Besides, teachers should tell to their students the importance of English knowledge.

### **2. Suggestion for the students**

The suggestion the writer would give to the students is that, they are expected to increase their motivation in learning English. They are also expected to be aware of the importance of English in their lives.

### **3. Suggestion for next researcher**

For the next researchers who are interested in conducting a similar research, they are expected to take the larger sample in their researches because the sample of this research is only 30 respondents. They are also expected to conduct their research in longer time in order to get more valid and reliable data in their research because this research was only conducted within a month.
