is significant correlation of students' reading fluency score to their reading comprehension score. Mean for students reading fluency score was **65.33** and the mean for students reading comprehension score was **66.33**, p was **0.016**, the 2-tailed value was smaller than 0.05 ($p < 0.05$). The result showed that the mean scores did correlate much between both students score. In short, the hypothesis of this research shows that H_0 is rejected and H_a is accepted, so it can be concluded that **“There is a significant correlation between reading fluency and students' reading comprehension at first year of Senior High School IT Al-Fitiyah Pekanbaru”**.

B. Suggestions

Based on the conclusion drawn above, thus the writer would like to give some suggestions related to the research findings for the teachers and the students in order that they are successful in teaching and learning English.

1. Suggestion to the Teacher

- a) Teachers should support their teaching and learning process by using interesting media.
- b) Teachers can encourage students' awareness about the importance of reading fluency in their daily life.
- c) Teacher makes reading as habitual activities for students in the school.

2. Suggestion for the Student

- a) The students should be more active in classroom activity.

- b) The students should practice their reading activity so that they can increase their ability in reading fluency

In addition, Senior High School IT Al-Fitiyah Pekanbaru should make the program to establish the English lesson such English Day, English Club and publishing article or poems in the bulletin board because those programs are really helpful for the students to study English.
