Based on what have been discussed as well as presented in the previous chapters, the writer would like to couclude that as follows:

1. The students' motivation was on **MIDDLE** category. It is based on the result of the questionnaire given because dealing with the table of students' classification score. It can be proved that the mean of students' motivation score was 63.22. It was middle level.
2. The students' reading comprehension was on **ENOUGH** category. It based on the result of the test given. The score of reading was 73.59. It is regarded as enough category.
3. Based on the data analysis, it can be seen that score of R square was 0.034, it means that the correlation of students motivation and their reading comprehension of narrative text was 0.034 % that was influenced by the other variable. It means that there was no significant correlation between students' motivation and their reading comprehension of

narrative text at the second grade of Islamic Junior High School of Al Muttaqin Pekanbaru.

## **B. The Suggestion**

### **1. Suggestion to the Teachers**

After getting the result of this research, the teacher should be able to create the condition to make the students' were motivated in learning process and always give motivation to the student before start to study. Because the more high motivation the high more score they are getting. At least there are two motivation the students that they must know. The first is internal motivation. It came from themselves and the second is external motivation. It can be from a teacher. So, both of them are important.

### **2. Suggestion to the Students**

The students have to increas their knowladge by more and more reading. And also students must be motivated to learning. The was no result without the high motivation. So, by reading narrative text, student can to be good reader.and also by more reading the more information you get. It all star from the small thing and make reading as a activity in your life.
