B. Suggestion

Based on the all explanation and the conclusion above, the researcher intends to give some suggestion related to English teaching learning as well as the future studies. Some suggestions can be presented to:

1. English Teachers

According to the result of the reseach, the average value of the students' reading comprehension and students' translation ability of analytical exposition text at the eleventh grade students of MA Ummatan Wasathan Pesantren Teknologi Riau in academic year 2017/2018 is good. So, the writer suggests the teacher to maintain and increase students' reading comprehension and translation ability. It is can be done by using various techniques or method to teach the students. Moreover, the teachers have to try to help students to overcome their fear of unknown words. Therefore, it is necessary for the teacher to help the students to understand the text with translate it, because by translating the students can understand the meaning of text clearly. As we know that reading comprehension is needed in National Final Examination or in Indonesian language we called as UAN. Almost of UAN test was come from reading comprehension. In other side, translation is needed to understand the meaning of text clearly, although there is no translation tests in UAN.

2. The School

The school is suggested to have a good quality library by providing the dictionaries for the students. The good quality library is expected to motivate the students increase their reading comprehension and translation ability.

3. The Students

The students should more active to use English in their daily life. Not only with the teacher, but also with friends. Because language is skill and to get skill, we need more practice because the teacher would contribute to the translation ability of the students. In addition, Do not be reluctant to read the English books, even though they are hard to understand. Also the students who love to read, they will have skill in writing, especially in translation.
