CHAPTER V

CONCLUSION AND SUGGESTION

A. The Research Conclusion

Based on what had been discussed as well as presented in the previous chapters, the conclusions which could be expressed for this research are as follows:

1. The students' knowledge of derivational words was categorized as good. It was based on the result of the test given. Dealing with the table of students' classification score, it could be proved that from the mean of the students' knowledge of derivational words score is 70,76 categorized as good level.

2. The students' knowledge of vocabulary was categorized good. It was based on the result of the test given dealing with the table of the students classification score. It can be proved that from the mean of the students' vocabulary mastery score is 75,63, categorized as good level.

3. The result of the data analysis was positive significant correlation in both. So, the conclusion p was 0.000, the 2-tailed value was smaller than 0.05 ($p < 0.05$). The result showed that the scores correlated between students' knowledge of derivational word to their vocabulary mastery at the second grade of MA Darel Hikmah.

B. The Suggestion

Based on the research that had been conducted, the researcher presents some suggestion pertaining to teaching and learning process, particularly about the students' knowledge of derivational words and their vocabulary mastery.

a. Students should enlarge their knowledge of derivational words to increase their knowledge of vocabulary.

b. Teacher should be creative in teaching the students about derivational words so that, it can help students in mastering vocabulary.

c. For readers that want to do a research, it is suggested to develop this research for increasing the educational quality.

d. For institutions, it is suggested to provide some books related to this research.
