## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. The Conclusion

The objective of this research was to find out whether there was a significant correlation between students' oral reading fluency and their reading comprehension or not. Based on the data analysis in the previous chapter, the researcher concludes that:

1. Most of samples in this research are in fair level of oral reading fluency the percentage is 63.67% or 28 students and 36.37% or 16 students are categorized into good level.
2. Most of samples in this research are in good level of reading comprehension the percentage is 40.10% or 18 students. 8.25% or 8 students are categorized into very good level. Then, 29.55% or 13 students are categorized into fair level. Last, 11.32% or 5 students are categorized into poor level.
3. There is a significant correlation between students' oral reading fluency and reading comprehension. It could be seen from the result of sig 2-tailed is 0.000. As explained before, if  $r_{\text{observed}} < 0.05$ ,  $H_a$  is accepted. So, it is indicated that there is a significant correlation between students' oral reading fluency and reading comprehension.

## **B. The Suggestion**

Based on the explanation and the conclusion, the researcher intends to give some suggestion related to English teaching learning as well as the future studies.

Firstly, the teachers should give more attention, motivate the students, be creative in giving a lesson and use various teaching method to make the students comfortable and interested in learning English. Then, oral communication could be provided through teaching techniques which can maximize and optimize communication skills of the students.

Secondly, the students should be more active in learning English, because reading comprehension is very important in their educational level. Thus, the students need to pay attention to the components of reading comprehension to make their reading comprehension more perfect.
