B. Suggestion

Based on the research finding, the researcher would like to give some suggestions especially to the teacher and students as follows:

1. This strategy is recommended to be applied in the teaching and learning process, especially in reading subject. Because, the researcher found that the students' reading comprehension especially in narrative text showed can improve, increase their vocabulary, and also enhance cooperative skill during reading activity.
2. The teacher should support Collaborative Strategy Reading by using several strategies (preview, click and clunk, get the gist, and wrap up). This strategy can make the students work together in predicting, clarifying, questioning, summarizing, and the reading the materials
3. The students should be interested in studying English because it is one of the keys to be successful in English.
4. The students should more often read the English books. Read the books wherever you are, because "the more you read, the more you get".
