CHAPTER V

CONCLUSIONS AND SUGGESTIONS

V.1 **Conclusions**

Based on the findings of this research, conclusions are drawn as in the following:

a. There is an influence of using internet on students' reading comprehension at second year students of MAS PP MTI Tanjung Berulak Kampar. It is proved by F for *Pillae Trace, Wilks' Lambda, Hotelling's Trace, and Roy's Largest Root* has p value 0,000 less than 0,05.

b. There is an influence of using internet on students' reading vocabulary mastery at second year students of MAS PP MTI Tanjung Berulak Kampar. It is proved by F for *Pillae Trace, Wilks' Lambda, Hotelling's Trace, and Roy's Largest Root* has p value 0,000 less than 0,05.

c. There is an influence of using internet on students' reading comprehension and vocabulry mastery at second year students of MAS PP MTI Tanjung Berulak Kampar. It is proved by F for *Pillae Trace, Wilks' Lambda, Hotelling's Trace, and Roy's Largest Root* has p value 0,000 less than 0,05.

V.2 Suggestions

Based on the findings of the research, some suggestions need to be put forward in order to be useful for teachers, students, and the researchers.

a. For teachers

It is suggested to teachers to be more active finding out strategies that can be implemented in the classroom to improve both students' reading comprehension and vocabulary mastery or other skills. Besides, the teachers can also find out interesting learning materials through the internet such as worksheets, puzzles, or games in order that the students feel more relax during learning process with more maximal results.

b. For students

The students must be able to use the internet for something good or positive for themselves. Never use it for something negative. Besides, the students should be able to take benefits from various learning multimedia that exist in the internet. Hopefully, it help them to improve their ability and skills.

c. For researchers

In addition, it is also suggested to the other researchers to develop this research using different perspective so that it can give a greater contribution to the school, teachers, students, and all sides related to the education.
