ABSTRAK

Dista Alfiana, (2019): Hubungan Antara Kecemasan Siswa dan Kemampuan Berbicara Mereka Pada Tahun Kedua milik di MA Darul Hikmah Pekanbaru.

Penelitian ini dilakukan berdasarkan masalah siswa dalam berbicara. Oleh karena itu, penelitian ini bertujuan 1) untuk mengetahui bagaimana kecemasan siswa, 2) untuk mengetahui bagaimana kemampuan berbicara siswa, 3) untuk mengetahui apakah ada hubungan yang signifikan antara kecemasan siswa dan kemampuan berbicara mereka. Penelitian ini memiliki dua variabel, kecemasan siswa sebagai variabel independen dan kemampuan berbicara siswa sebagai variabel dependen. Penelitian ini adalah penelitian correlational. Subjek dari penelitian ini ialah murid kelas sebelas MA Darul Hikmah Pekanbaru sementara objeknya adalah hubungan kecemasan siswa dengan kemampuan berbicara mereka. Populasi dalam penelitian ini adalah 30 siswa. Untuk mengambil sampel, peneliti menggunakan teknik sampling acak sederhana dan mendapatkan 30 siswa sebagai sampel. Dalam pengumpulan data, peneliti menggunakan tes tertulis angket (*Questionnaire*)untuk mengukur kecemasan siswa dan tes lisan (Storytelling) untuk mengukur kemampuan berbicara. Untuk menganalisis data, peneliti menggunakan korelasi pearson product moment. Dari data yang telah dianalisis dengan menggunakan SPSS versi 22, dapat dilihat bahwa ada korelasi yang signifikan antara kecemasan siswa dan kemampuan berbicara mereka. Hal tersebut dapat dilihat dari nilai probabilitas sig.t adalah 0.000 lebih kecil dari nilai alpha 0.05 (sig.t < 0.05). Itu berarti H₀ ditolak and Ha diterima. Dengan kata lain ada korelasi yang signifikan antara kecemasan siswa dan kemampuan berbicara mereka. Peneliti juga menemukan bahwa 48,30% dari kemampuan berbicara siswa kelas sebelas MA Darul Hikmah Pekanbaru dipengaruhi oleh kecemasan sfswa. Kemudian, 51,7% lainnya dipengaruhi oleh faktor lain.

Kata Kunci: Hubungan, Kecemasan Murid, Kecakapan Berbicara

ABSTRACT

Dista Alfiana, (2019): The Correlation Between Students' Anxiety and Their

Therefore, this research was aimed 1) to find out how students' anxiety, 2) to find At how students speaking ability, 3) to find out the significant correlation between students' anxiety and their speaking ability. This research was a correlational research. The subject of this research was the eleventh grade students at Islamic Senior High School Darul Hikmah Pekanbaru whereas the object of this research was the correlation between students' anxiety and their speaking ability. The population of this research is 151 students. To choose the sample, the researcher used proportional random sampling technique and 30 students chosen as the samples. In collecting the data, the researcher used written test for students' anxiety (questionnaire) and oral test (storytelling) for speaking ability. From the data analysis which had been done by using SPSS 22.0 version, it could be seen that there was a significant correlation between students anxiety and their speaking ability. It could be shown that the probability of score sig.t is 0.000, smaller than the significant alpha of 0.05 (sig.t < 0.05). It meant that H₀ was rejected and H_a was accepted. In other words, there was a significant correlation between students anxiety and speaking ability. The researcher also found that 48,30% speaking ability of the eleventh grade of Islamic Vocational School Darel Hikmah Pekanbaru was influenced by speaking anxiety. Then, the other 51,7%

This research was conducted based on students' problem in speaking.

CHAPTER I

INTRODUCTION

milik **Background of the Study**

UIN English is a second or foreign language that learned by people in the S world. That is because English was claimed as international language and Sn ka demand people to learn English. By that fact, English is not only learned by R people for business purpose, but also for students in all stages of school. As an international language, English has important place in school subject. Almost or maybe all of schools, especially in Indonesia, used English as the subject in the final examination of their school.

There are four basic skills in learning English that should be mastered by the students who interest in learning English; such as listening, speaking, reading, and writing. Speaking is an important skills that the students should be acquired because it involves oral communication and several elements; such as grammar, vocabulary, pronunciation, fluency, and comprehension. Theoretically according to Haris (1974, p.75), (1) grammar refers to the sentence structure and tenses, (2) vocabulary can be defined as the words use in language covering content word and function word, (3) pronunciation refers to the way of a person produces or utters the sound of the words meaningfully and accurately to be understood by others in communication, (4) fluency can be defined as the ability how to speak fluently and accurately and (5) comprehension refers to the speakers' understanding about what are they

B saying to the listeners in order to avoid misunderstanding information. Thus, × 0 p speaking is considered to be the most difficult skill because most of the ta З students usually obtain some difficulties and they have problems when they lik interest to express their ideas even in a simple form of conversation.

By showing their speaking performance, teacher or another people can z S give feedback about it. But to speak in new language, as English, is not easy S ka for someone/student who does not have high self-confidence. Speaking fear, R anxiety, and stress can be well-managed, eliminated, or better yet, effectively a incorporated into someone's speaking events. When student do not want to speak or feel anxious to speak a foreign language that they learn, it may become a problem for them. Or maybe they will fail in their proficiency.

From the fact the researcher found some difficulties or problems that come to students when they learn about English. For students when they having English class, they are demanded to practice the language by speaking. Speaking fluently can show that they get good proficiency in learning English. Sometimes the students are confused about teaching material given by the teacher in the teaching and learning process but they feel worry if they should ask to their teacher. They are embarrassed to say when they do not even understand what the teacher says about because they are nervous if they have to speak to the teacher while the other students in the class pay attention to that student. Thus, they choose to listen to the teacher quietly when the teacher explain the material. The students oftenly open their dictionary first when they intend to express their ideas or they purpose to ask something that they do not

B understand yet in front of teacher or the other students with English. By all × cip means, they have a high anxiety to speak in English in front of many people or ta even just with their friend. They are too afraid to speak English because if В III K they commit mistake in grammar or pronunciation while they are speaking, Z the other students will laugh and mock to that student and their anxiety will be Sus higher than before.

ka Anxiety has a big impact to second language development. It means R that if the students have low anxiety, they will be more success on acquiring English. Thornburry (2005, p.28) states that the factors which can increase to speak incorrectly and cause an acute sense of anxiety are the lack of vocabularies, improper grammar, and fears of mistakes. Moreover, Juhana (2012, p.100) adds that the very limited chance to practice can be the causes of being not confidence, shyness, and silence that impede a natural communication. If they expect that they are going to be failed on acquiring English, they will not be able to speak English well.

According to Horwitz, Horwitz, and Cope (1986) foreign language anxiety is caused by the apprehension of communicating with others in the foreign language context. To make a success education in learning the foreign language, we can not ignore about the language anxiety. The learners' anxiety in speaking class to perform in front of the class may influence in some aspects, such as in language acquisition, or, to increase their ability in mastery the foreign language.

× In order to accomplish student's needs toward speaking, School Based C σ Curriculum 2013 (K13) provides speaking as one of the ability in mastering ta English that must be taught and learned in senior high school. Based on В III K interviewed one of the English teachers in Islamic Senior High School Darul Z Hikmah Pekanbaru, English is taught once a week (120 minutes) and the passing S grade of English subject in eleventh grade is 78. Sn

However, students Islamic Senior High School Darul Hikmah Pekanbaru ka \mathbf{z} should have the competence in English, especially in speaking. The fact in the B field said the different thing. some of the students at Islamic Senior High School Darul Hikmah Pekanbaru had low ability to speak. Their score were lower than passing grade. In fact, not all of students reach the best achievement in speaking because of their different knowledge background. Nevertheless, based on the ideas above and based on researcher's prelimenary observation to problems above, the researcher found that the students of Islamic Senior High School Darul Hikmah Pekanbaru have different anxiety that influence language learners and students achievement, especially in speaking subject. It can be seen in the following phenomena:

- 1. Some of the students were not able to speak English fluently.
- 2. Some of the students felt anxious when the teacher asked them to do speaking in front of the class.
- 3. Some of the students were chose to silent rather than active speaking.
- 4. Some of the students always look up dictionary when they want to speak English.

0 Т B × Based on the descripsion above and the importance of good speaking, C σ the researcher is very interested in conducting a research entitle:

"The Correlation Between Students' Anxiety and Their Speaking Ability at i i k The Second Year of Islamic Senior High School Darul Hikmah Pekanbaru".

B. Problems

Ka 1. Identification of the Problem

Based on the explanation above, the researcher identified the problem as follows :

- What factorsmade students anxious when they were being asked by the a. teacher for speaking in front of the class?
- Why factors made students difficult to speak fluently? b.
- What factors made students chose to silent rather than active in c. speaking?
- d. What factors made students always look up dictionary when they want to speak English?

State Islamic University 2. Limitation of the Problem

In relation to the identification of the problem occured in teaching and learning process of speaking which was provided above, the problem of this research is necessary to be limited. Therefore, this research is only focus on students' anxiety and their speaking ability .

3. Formulation of the Problem

The problem of this research can be formulated in the following questions:

- How is the students' anxiety at the second year of Islamic Senior High 1. School Darul Hikmah Pekanbaru?
- How is the students'speaking ability at the second year of Islamic 2. Senior High School Darul Hikmah Pekanbaru?
- Is there any significant correlation between the students' anxiety and 3. their speaking ability at the second year of Islamic Senior High School Darul Hikmah Pekanbaru?

C. Objectivesand Significance of the Research

1. Objective of the Research

- a. To find out how the students' anxiety at the second year of Islamic Senior High School Darul Hikmah Pekanbaru.
- b. To find outhow the students' speaking ability at the second year of Islamic Senior High School Darul Hikmah Pekanbaru.
- c. To find out the significant correlation between students' anxiety and their speaking ability at the second year of Islamic Senior High School Darul Hikmah Pekanbaru. SKA RI

Significance of the Research 2.

The research is very important because it will contribute and carry out the following necessities, they are:

σ

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

State Islamic University of Sultan Syarif Kasim Ria

 a. To fulfill one of the requirements for the researcher to complete her undergraduate degree program at English Education Department of Education and Teacher Training Faculty of State Islamic University of Sultan Syarif Kasim Riau.

- b. Theoretically, the researcher can get information from this reserach that can be very useful to enlarge her knowledge, especially about correlation between student's anxiety and their speaking ability.
- c. To provide some information to the students and the English teacher related to students personality that will help them to develope their speaking ability.

D. Reason for Choosing the Title

- 1. The topic need to be discussed , because the researcher wants to know the correlation between students' anxiety and their speaking ability.
- 2. The title of this research is relevant with the researcher status as a student of English Education Department of State Islamic University of Sultan Syarif Kasim Riau.
- 3. The problems of this research are not investigated yet by other previous researchers .

a **Definition of Terms** E. cip

1. Correlation

0

Т

ta

milik Hartono (2008) said that correlation is correlation between two variables (variable I and variable II). This statement also supported by C Z Creswell (2008), he stated that correlational design are procedures in S quantitative research in which investigators measure the degree of association S ka or relation between two or more variables using the statistical procedure of J b correlational analysis. This degree of association expressed as a number, indicates whether the two variables are related or whether one can predict another.

2. Anxiety

Anxiety is feelings of uneasiness, frustration, self-doubt, apprehension or worry. In this research, anxiety is one of the factors that influence students' ability in speaking of English. Students are afraid of making mistakes and shy to speak English can be caused by anxiety.

Horwitz et al.(1986, p.125) stated that anxiety is described by psychologists as a subjective feeling of tension, apprehension, nervousness, and wrong associated with an arousal of the autonomic nervous system. Similar theory of anxiety is stated by Santrock (2004), anxiety is feelings of apprehension.

3. Speaking Ability

Speaking ability is competency of the students to express their ideas, opinion or feeling in oral communication (Rita,2009, p.6). In this reserach, this

term means the ability of the students mentally or physically to communicate, share, and express idea in English by considering the aspect of speaking ability. Students speaking ability also can be seen when the students speak fluently that related to their knowledge in past.

SUSKA RIA

CHAPTER II

REVIEW OF RELATED LITERATURE

A Theoretical Framework

1. The Concept of Speaking

a. Speaking Definition

Speaking plays an important role in communication, especially in oral communication, because human being needs to conduct their life in order to build some relationship with others. In English learning there are five components for speaking, generally recognized. They are pronunciation, grammar, vocabulary, fluency and comprehension. Johnson and Morrow (1981, p.70) said that speaking which is popular with term of oral communication is an activity between two or more people in which listeners and speakers have to react to what they hear and make their contributions to convey or receive the meaning. In accordance with the definition, speaking or oral communication will happen if there is interaction between two or more people. It is required to express what the speakers purpose to say as effectively as possible in order to convey the message for the hearers but if someone intends to say something, they should be aware to construct the meaning in order to get an understanding from the listener and to avoid misunderstanding between the speaker and the listener.

State Islamic University of Sultan Syarif Kasim Ria

There are another definitions of speaking. Chaney (1998, p.13) argued that speaking is the process of building and sharing meaning through the use of verbal and non-verbal symbols, in a variety of contexts. Moreover, Matthew (1994, p.45) said "speaking is any process in which people share information, ideas and feeling. It involves all of body language mannerism and styles anything that adds meaning to a message". It can be said that, when the students talk about their ideas or opinion, there is an interaction between the speaker and the listener to clarify the information intended. In other words, the speaker has to be able to convey the ideas clearly in process of speaking, as the result, the listener can receive and understand what the speaker means. In summary, it can be concluded that speaking is the most important skill of language which is about expressing ideas, opinions, or feelingsto others by using words or sounds of articulation in order to inform, to persuade, and to entertain.

b. Components of Speaking Ability

Speaking is not only means of how we speak fluently and correctly to be understood by others, but it also has components that explain the way we produce the utterances or sentences meaningfully and accurately to be understood by others. Hughes (2003, p.131) stated that speaking ability always assessed through several elements like grammar, vocabulary, fluency, comprehension, and pronunciation. In addition, Richard and Hornby (1984) stated that, there are five components of speaking skill that

are normally recognized as crucial aspect that should be mastered those teachers and students in order to apply and practice of speaking, they are vocabulary, grammar, fluency, pronunciation, and comprehension. Moreover Haris (1974, p.75) said that, there are five components to measure students' speaking ability(pronunciation, grammar, vocabulary, fluency, and comprehension. For this reason, the researcher would explain each of those items that mentioned one by one as follows:

1.) Fluency

Fluency refers to the ability how to speak fluently and accurately. Smoothness or flow the sounds, syllabus, words and phrases can be indicated the quality of her or his fluency whether it is logically smooth or not.

2.) Pronunciation

Pronunciation is the way of a person produces or utters the sound of the words meaningfully and accurately to be understood by others in communication such as *different phonemes*, rising and falling in *intonation* and *stress* (Harmer 2001, p.28-33).

3.) Vocabulary

Vocabulary can be defined as the words use in language, phrase, clauses, and sentences. If someone has many words to utters what they interest to say, they will be smooth to give some information or receive the information. In vocabulary, the students should know about content word and function word in English vocabulary. Content word refers to classes of

0

I

ak

word (noun, verb, adjective and adverb) and function word refers to the function of the word in the sentence whether it is as a subjective pronoun or objective pronoun.

4.) Grammar

Basically, grammar refers to the sentence structure and tenses. Heaton (1991, p.5) defined grammar as the students' ability to manipulate structure and to distinguish appropriate grammatical form in appropriate ones. Besides that, grammar will help the students to speak fluently.

5.) Comprehension

Comprehensibility denoted the ability of understanding the speakers intention (understand what the speaker said) and general meaning (get the point what the speaker said) by Heaton(1991, p.35). Cohen (2005, p.51) argued that to the fact that participants fully understand the nature of the research project, even when procedures are complicated and entail the research pro risks. From thos the speakers und order to avoid m question or state comprehends we Speaking and mastered by risks. From those two experts, it can be said that comprehension refers to the speakers understanding about what are they saying to the listeners in order to avoid misunderstanding information. If someone can answer other question or statement correctly, it indicates that he or she understands and comprehends well.

SUSKA RIA

Speaking ability is one of language abilities that have to be learned and mastered by the students in learning foreign language. In addition

σ

University of Sultan Syarif Kasim Ria

Loma (2004) stated, "Speaking skills are an important part of the curriculum in language teaching, and this makes them an important object of assessment as well". Littlewood (1981, p.1) stated that speaking ability is a combination of structural and functional aspect of language. The structural aspect concentrates on the grammatical system, describing way in which linguistic items can be combined. It is understood that speaking is a very difficult and complex skill to be learned especially by the foreign language students. There are many different abilities included in this skill.

Arthur Hughes (1990, p.110) said that speaking ability on four components: contents, fluency, eye context and pronunciation. In short, speaking involves different abilities, which should be used simultaneously.

From the descriptions above, the researcher concluded that speaking ability is the ability to produce utterances to communicate that conducted of some indicators such as pronunciation, grammar, vocabulary, fluency, and comprehension. Speaking ability report act or situation in that way we communi d. Factors Influence Student's Speaking Ability fluency, and comprehension. Speaking ability also the ability is describe a report act or situation in that way we communicate with the others.

Tuan & Mai (2015) explained the factors influence student's speaking ability. The researcher got some of them as follows:

1) Performance conditions

different Learners carry speaking activity under out а conditions.Performance conditions impact speaking performance and

S

Sn ka

R

a

15

these conditions involve time pressure, planning, the quality of performance, and the amount of support (Nation & Newton, 2009).

2) Affective factors

One of the most important influences on language learning success or failure is probably the affective side of the learners (Oxford, 1990).

3) Listening ability

Doff (1998) says that learners cannot improve their speaking ability unless they develop listening ability. Learners should comprehend what is uttered to them in order to have a successful dialogue.

4) Topical knowledge

Bachman and Palmer (1996) defined it as the knowledge structures in longterm memory. That is, topical knowledge is the speakers knowledge of related topical information.

5) Feedback during speaking activities

A lot of learners expect their teachers to give them the necessary feedback on their speaking performance. According to Harmer (1991), the decisions that instructors adopt towards their learners performance depend on the stages of the lesson, the tasks, and the kinds of mistakes they make. Harmer (1991) also continued that if instructors directly correct their students' problems, the flow of the dialogue and the aim of the speaking task will be spoiled. Baker and Westrup (2003) supported the above statement and said that if learners are always corrected, they will be demotivated and afraid of talking.

The fear of speaking English is pertinent to some personality constructs like anxiety, inhibition, and risk taking. Speaking a language sometimes results in anxiety. Sometimes, extreme anxiety may lead to despondence and a sense of failure in learners (Bashir, Azeem, & Dogar, 2011). According to Woodrow (2006), anxiety has a negative effect on the oral performance of English speakers. Adults are very careful to making errors in whatever they tell. In their opinion, errors show a kind of unawareness which can hinder them to speak English in front of other people. Speaking anxiety may originate from a classroom condition with the different abilities of language learners. Learners are divided into two groups: strong and weak ones. The strong learners often dominate the slow and weak ones. The weak learners do not usually want to talk in front of the strong ones which leads to their silence during the whole class activity. Inhibition is a feeling of worry that stops people from telling or performing what they want (Cambridge A. L. Dictionary, 2008). All human beings make a series of defenses to protect the ego. Due to the fact that committing mistakes is a natural process of learning a language, it certainly causes potential threats to one's ego. These threats disappoint the learners to talk English and prefer to be silent rather than being criticized in front of a large number of people (Brown, 2000). Risk-taking is pertinent to inhibition and self-respect. EFL learners who have a low selfrespect tend to stop taking a risk of committing mistakes in their speaking

State Islamic University of Sultan Syarif Kasim Ria

tasks which resulting in the inhibition to the betterment of their speaking skill (Mahripah, 2014).

2. The Concept of Anxiety

a. Anxiety Definition

Anxiety is one of the internal factors in personality besides selfesteem, willingness to communicate and motivation. There are several definition about anxiety. Horwitz et al(1986, p.125) stated that anxiety is described by psychologists as a subjective feeling of tension, apprehension, nervousness, and wrong associated with an arousal of the autonomic nervous system. Anxiety becomes the most general emotional dilemma of someones' feeling. Everyone will feel anxious towards something that will happen in their life, especially when they have to face speaking exercise.

Anxiety can give negative impact to the someones' personality if he or she can not manage it. Mayer (2008, p.2) said that anxiety is normal aspect of life and of being human, and it has a positive side to it, too. Moreover, Griffin and Tyrrell (2007, p.5) argued that if students can control their anxiety into positive feeling instead of being controlled by it, they will reach optimal performance.

Otherwise, anxiety becomes a problem, if it causes emotional pain and disrupts students ability because it will hinder the students to acquire English as their foreign language. In brief, anxiety is a normal feeling that

σ

State Islamic University of Sultan Syarif Kasim Ria

is happened in someone. When someone has a problem then they feel anxiety to face it, it will give a good impact if they can manage their anxiety into positive feeling. Thus, it is related to speaking skill because when they have high anxiety, they will speak hesitantly. They are too worry when they speak in English. Hence, their speaking are going to be slow and they will repeat many words on their dialog.

b. Aspects of Language Anxiety

Language anxiety caused by various causes during learning process. The primary sources of language anxiety, stated by Horwitz, Horwitz, and Cope (1986, p.127) are: communication apprehension (the fear of communicating with other people), test anxiety (fear of exams, quizzes, and other assignments used to evaluate students' performance), and fear of negative evaluation (worry about how others view the speaker). Here are the explanation about three of them:

1.) Communication Apprehension

Communication apprehension arises from someones fear and shyness if they have to communicate with others. Wu and Chan (2004, p.292) said in communication apprehension, people usually afraid of oral communication that is about speaking and listening. They will get difficulty to understand what people are saying and to make someone understands what they purpose to say.

σ

State Islamic University of Sultan Syarif Kasim Ria

2.) Test Anxiety

Wu and Chan (2004, p.293) argued that test anxiety can occurs when students have poor performance in the previous test. The students develop a negative stereotype about tests and they have irrational perceptions in evaluative situation. It means that test anxiety is related to someones fear of test-taking situation. The students tend to deal with test anxiety every time they got to face frequent test. Mayer (2008, p.77) stated that every student understand that taking a test means she will be graded, judged, and compared to her classmates, and that performing will get negative consequence from her teacher and parents. He also mentioned that children with test anxiety can experience any number of physical, mental, and emotional symptoms, which can vary. Physical symptoms included shortness of breath. heart palpitations, chest tightening, or sore throat, stomachache, vomiting, or diarrhea, shaky limbs and trembling, headache and body aches. Those symptoms will lose students' concentration on the test material, then they are getting difficult to finish their test because accidentally they forget the material of the test that has been remembered before.

3.) Fear of Negative Evaluation

Lucas, Miraflores & Go (2011, p.102) stated that fear of negative evaluation is the apprehension about other evaluations which may include avoidance of evaluative situation and the expectations that

State Islamic University of Sultan Syarif Kasim Ria

other might evaluate them negatively. Moreover, Young (2012, p.52) argued that in his survey on students' perspective on anxiety and speaking in the foreign language, many students reported that they would be more willing to speak if they were not too afraid of making a mistake and being evaluated negatively in front of their teacher and their peer. It means that if the students are not sure of what they are saying, they will feel fear of negative evaluation from others and also feel anxious because they do not want to look stupid in front of others.

From the explanation above, it can be summed up that three components of foreign language anxiety gave big impact for students' teaching learning process especially in speaking. In this case, communication apprehension, test anxiety and fear of negative evaluation was used to measure their anxiety through questionnaire. On those questionnaire, there are 5 items related to the communication apprehension covering 7 items related to the test anxiety and covering 8 items related to the fear of negative apprehension. Thus, total of questionnaire is 20 items.

c. Students' Anxiety in Speaking

Foreign language anxiety plays important role in learning foreign language because it can hinder the students in acquiring their target language. Horwitz et al. (1986, p.128) discussed foreign language anxiety as a distinct complex of self perception, beliefs, feelings, and behaviors

σ

State Islamic University of Sultan Syarif Kasim Ria

related to classroom language learning arising from the uniqueness of the language learning process.

Moreover, Horwitz (2001, p.121) stated that foreign language anxiety is a situation specific form of anxiety that does not appear to bear a strong relation to other forms of anxiety, it is related to the language learning context. It means that there is a relationship between foreign language anxiety and language learning. Anxiety can give negative and positive impact to the students who desire to master foreign language especially English. It can be negative if the students can not manage or control their anxiety. It will be difficult for them to learn English and their score will be bad. Otherwise, anxiety can give positive impact to the students. For example, when the students are feeling anxiety about not passing her or his examination, they will be serious in learning English.

There are three types of anxiety perspective on the nature of anxiety can be found in literature, those are: state anxiety, trait anxiety, and situation-specific anxiety.

Pappamihiel (2002, p.330), stated anxiety is a feeling of apprehension under certain situation, while trait anxiety is a condition where individuals have a tendency to become anxious regardless of the circumstance. The last type according to MacIntyre & Gardner (1991, p.87) is situation-specific anxiety which only appears when certain specific factors or events are present and occurs consistently.

State Islamic University of Sultan Syarif Kasim Ria

In short, Anxiety is closely related to the students' achievement on acquiring English. Furthermore, the students will be more difficult to acquire English if they have high anxiety because they are too afraid of making mistake while they learn English.

d. Level anxiety

As the writer said above, anxiety can give a negative effect for student in foreign language class. Whereas to speak a foreign language student has to have high self-confidence, so teacher can measure her/his performance. To know how far student's anxiety influences student performance, we need to give a test anxiety. This test anxiety is a type of performance anxiety. In situations where the pressure is on and a good performance counts, people can become so anxious that they are actually unable to do their best.

There are three levels of anxiety: low, moderate, and high anxiety. Horwitz et al. (1986) developed test anxiety for student, that is the Foreign Language Classroom Anxiety Scale (FLCAS). The test anxiety contains of 33 items with five point scale. It starts from *Strongly Agree* to *Strongly Disagree*.

- σ Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau

Anxiety in speaking have negative effect on students academic, cognitive, social, and personal level. Anxiety has big impact on students academic achievement. Horwitz, Horwitz, and Cope (1986, p.126) mentioned that an anxious student tends to be less concentrated, forgetful, heart beating, and sweating that may lead to the negative behavior such as avoiding the class or procrastinate their homework. At the end, these behaviors will affect their cognitive competence because high-anxious students will perform and achieve lower than those of low-anxious students in the class. In this case, if students anxiety increase, their academic achievement will decrease.

Additionally, in the effect on students cognitive, MacIntyre and Gardner (1994, p.285) said that anxiety has also been shown to have negative influences, both pervasive and subtle, on the three stages of cognitive processing: input, processing, and output. For this reason, the students who have anxiety will get difficult in processing meaningful input, and to be less responsive to language output.

In terms of social effects, there are many ways that social context give an effect to language anxiety. MacIntyre (1999, p.38) stated that in a competitive classroom atmosphere, difficult interactions with teachers, or risk embarrassment, opportunity for contact with member of the target language group may all influence language anxiety.

σ

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber

Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah

State Islamic University of Sultan Syarif Kasim Ria

In addition, MacIntyre and Gardner (1991, p.298) said that perhaps the most recurring finding on language anxiety and one of its most important social effects is that anxious students do not communicate as often as more relaxed students. It means that if the students have high anxiety, they will avoid to communicate to other people because they worry about others perception or fear of making mistakes when they speak in foreign language. Personal effect has negative effect on acquiring English, MacIntyre (1999, p.39) contended that among the most troublesome effects of language anxiety is the severe anxiety reaction for an individual language learner. Prive (1991, p.105) revealed that some language students who have high anxiety will choose to ignore or stay away from their language class rather than to follow the class. Thus, it can be said that this type of effect is considered as the most debilitating effect of language anxiety.

In short, anxiety has big impact for students achievement in speaking score because their high-anxiety will give an effect to their achievement. In sense, if students' anxiety increase, their academic achievement will decrease. Whereas, if students' anxiety is high, their speaking skill will low.

Review of Relevant Research

According to Syafi'i(2007), a relevant research is required to

observe some previous research conducted by other researches in which

they are relevant to the research you are conducting .The researcher found

some studies related to the study between students' anxiety and speaking

1. The first was a case study by Izumi (2017) from University of

Lampung, Bandar Lampung . She had done research about the

study between students' anxiety and their speaking ability . The

participants in this research were the first grade students of SMA

Negeri 1 Kabupaten Tangerang. A qualitative case study approach

was employed, and the data were taken through questionnaire and

speaking test .The finding revealed that there was a significant

correlation between students' anxiety and their speaking ability at

the first grade students' of SMA Negeri 1 Kabupaten Tangerang .

The conclusion was the increase of students' anxiety is followed by

the decrease of speaking skill. Whereas, the decrease of students'

2. The second was a case study from Mulyani (2011) from State

Islamic University of Sultan Syarif kasim Riau. This study focused

on the correlation between students' anxiety level and their

speaking ability. The participants in this research were the second

year of senior high school 1 Enok. Questionnaire and speaking test

anxiety is followed by the increase of speaking skill.

26

were used to collect the data. The finding revealed that there was a significant negative correlation between students' anxiety level and their speaking ability at the second year students of SMAN 1 Enok. The conclusion of this research was the higher students' anxiety level, the lower students' ability in speaking English they get and the lower students' anxiety level, the higher students' ability in speaking English they get.

The previous studies about students' anxiety and speaking ability have convinced the researcher that anxiety can exist when we learn foreign language and it can give negative impact toward learning process. However, the previous research have mainly focused on language learner at the second grade of senior high school. Hence, this research is significant to find out the correlation between students' anxiety and speaking ability, and to investigate which aspects of anxiety affecting students' anxiety toward speaking ability the most.

Operational Concept

Operational concept is a main element to avoid misunderstanding and misinterpreting in a specific study as a concept is still operated in an abstract from the research planning which should be interpreted into particularly words in order to be easy to measure. In this reasearch, there are two variables, they are X refers to students' anxiety and Y refers to students'

State Islamic University of Sultan Syarif Kasim Ria

Sn

speaking ability. The writer wants to know how anxious students are while they learn English subject especially in speaking, using Foreign Language Classroom Anxiety Scale (FLCAS) from Horwitz. Hence the result can be used by teachers to pay more attention to their students, especially students who got the low achievement.

Assumptions and the Hypothesis of the Research

$\frac{\mathcal{P}}{\omega}$ 1. Assumptions

Based on the theories and explanations above, the writer had assumption related to the relationship between students' anxiety and their speaking ability.

a. The lower students' anxiety, the better their speaking ability.

b. The higher students' anxiety, the lower their speaking ability.

2. Hypothesis

a. Null Hypothesis (H_o):

There is no significant correlation between students' anxiety and their speaking ability at the second year of Islamic Senior High School Darul hikmah Pekanbaru.

b. Alternative Hypothesis (H_a):

There is a significant correlation between students' anxiety and their speaking ability at the second year of Islamic Senior High school Darul Hikmah Pekanbaru.

CHAPTER III

METHOD OF THE RESEARCH

In conducting the research, the researcher used quantitative research.

Quantitative reserach is essentially collecting numerical data explain a

particular phenomenon (Mujis, 2004, p.2). Furthemore, The design of the

reserach was correlational research. Correlational research indicates an

association between two or more variables (Creswell, 2008, p.358).

Correlational design research had two primary correlational designs as

stated by Creswell (2012, p.339). They are explanatory design and

prediction design. In this research the researcher choose the explanatory

because this study just investigated the degree of association between two

variables. Creswell (2012, p.340) defines that explanatory design is a

correlational design in which the researcher is interested in the extent to

which two variables (or more) covary, that is where changes in one variable

independent variable (X) and the second variable is the speaking ability as

The correlation of two variables can be illustrated in the figure bellow :

Figure III.1 Ilustration of Correlation cited from Sugiyono (2002, p.42)

The first variable in this reserach is students' anxiety as the

Y

are reflected in changes in the order.

the dependent variable (Y).

Y : The result of speaking ability test

The Location and Time of the Research

This research conducted at Islamic Senior High School Darul Hikmah Pekanbaru on September till October 2019.

The Subject and Object of the Research

The subject of the research waseleventh grade students at Islamic Senior High School Darul Hikmah Pekanbaru, meanwhile, the object of the research was students' anxiety and their speaking ability.

D. The Population and Sample of the Research

1. The population

Population is the whole subject of a research stated by Arikunto (2002, p.108),the population in this research is the eleventh students of Islamic Senior high School pekanbaru with total of 151. The specification of the population can be seen on the table below:

| No | Class | Population |
|----|-------------|------------|
| 1 | XI SAINS 1 | 32 |
| 2 | XI SAINS 2 | 20 |
| 3 | XI SOSIAL 1 | 30 |
| 4 | XI SOSIAL 2 | 20 |
| 5 | XI RELIGI 1 | 30 |
| 6 | XI RELIGI 2 | 19 |
| | Total | 151 |

| Table III.1 |
|--------------------------------------|
| The Total Population of the Research |

σ

Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau

2. Sample

The researcher used simple random sampling as a technique to take samples from 6 classes. According to Singh (2006) a simple random sampling was technique for choosing the sample in which all the population get an equal and independent chance to be selected.Arikunto (2002, p.112) stated that If total of respondent are less than 100, it should be take all of the population. Meanwhile, if total of respondent are more than 100, so we can take 10%-15% or 20%-25% or more. Based on the theory the researcher chose 20% of the total population. So, the researcher took 30 students as the sample by using lottery technique.

| No | Class | Population | Sample |
|----|-------------|------------|--------|
| 1 | XI SAINS 1 | 32 | 5 |
| 2 | XI SAINS 2 | 20 | 5 |
| 3 | XI SOSIAL 1 | 30 | 5 |
| 4 | XI SOSIAL 2 | 20 | 5 |
| 5 | XI RELIGI 1 | 30 | 5 |
| 6 | XI RELIGI 2 | 19 | 5 |
| | Total | 151 | 30 |

Table III.2 The Total Sampleof the Research

The Technique of Collecting the Data

The researcher were used two techniquesto collect the data, they are questionnaire and speaking test:

1. Questionnaire

According to Brown in Dornyei (2003), Questionnaires are any written instruments that present respondents with a series of questions or

Hak Cipta Dilindungi Undang-Undang

State Islamic University of Sultan Syarif Kasim Ria

statements to which they are to react either by writing out their answers or selecting from among existing answers. The questionnaires were used to collect students' anxiety. The form of the questionnaire was Foreign Language Classroom Anxiety Scale (FLCAS) which adopted from Horwitz. The questionnaire used five point Likert scale format ranging . In more description, they are 1 'Strongly Disagree', 2 'Disagree', 3 'Neutral', 4 'Agree', 5 'Strongly Agree'.

To prevent the misunderstanding, the questionnaire was administered in Bahasa because all participants learn English as a foreign language. In this case, the researcherer helped by her adviser in translating the items of questionnaire to ascertain the items have equal quality in both languages . The participants were have 30 minutes to respond 20 items of the questionnaire. Participants informed that no one would have an access to the data except the researcher and the data would be use only for research purpose. The questionnaire itself used to know the students level in speaking anxiety, they are in between high, moderate, or low anxiety.

2. Speaking Test

In this research, the researcher used a test for measure students speaking ability. According to Brown (2003, p.3) test is a method of measuring a person's ability, knowledge, or performance in a given domain. The test that the researcher uses in this research to obtain speaking score ability is oral test. Furthermore, the researcher uses extensive speaking in testing students speaking ability.According to Brown and Abeywickrama

F. The Validity and Reliability of Test

the table below:

researcher was helped by two raters.

The quantitative research is always depends on measurement. These measurements are validity and reliability through instrument of research. The instrument of this research arequestionnaire and speaking test.

| Tal | ble | III | .3 |
|--------|-----|-----|-----|
| peakin | g R | lub | ric |

| No | Description | Level | | | | | |
|-----|-----------------|-------|---|---|----|---|---|
| INO | Description | 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Pronounciation | | | 1 | 1 | | |
| 2 | Grammar | | | | | | |
| 3 | Vocabulary | | | | | | |
| 4 | Fluency | | | | | | |
| 5 | Comprehension | | | | | | |
| 5 | Fotal of Score: | | | | 1 | | |
|] | Final Score: | | | | 1. | | |

(2010, p.184) Extensive (monologue) types refer to speeches, oral

production, and storytelling. Extensive speaking also activity to enhance

students' spoken fluency (Sarah & Reynolds, Eric D. 2013, p.56). That is

why the researcher chose interview to be a test. In order to give scoring, the

scored the students' speaking ability according to categories by Hughes

(2003, p.131) stated that speaking is a complex skill because at least it is

concerned with components of pronounciation, grammar, vocabulary,

fluency and comprehension. For students' speaking rubric, it can be seen in

In order to assess the students' speaking ability, the researcher

a σ Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau

1. Validity of Questionnaire

Validity was a matter of relevance, it meant that the test measured what it was designed to measure. The researcher analyzed it from content and construct validity to measure whether the test was a good validity or not. Content validity was concerned with whether the content of the test was sufficiently representative and comprehensive for the test or not. While, Construct validity focused on the kind of the test that used to measure the ability. Since the purpose of this test was to know students' anxiety, this research applied from Foreign Language Classroom Anxiety Scale (FLCAS). The questionnaire had standardized for each item from Foreign Language Classroom Anxiety Scale (FLCAS). Furthermore, it had been used to measure anxiety and created by the expert of language learning psychology, Horwitz, Horwitz, and Cope (1986). It could be said that the questionnaire was valid.

2. Validity of Speaking Test

Validity is related closely to the purpose of the test. A test is considered valid if the test measures the object to be measured and suitable with the criteria (Hatch and Farhady, 1982, p.250). This speaking test had two basic types of validity; content and construct validity.

In content validity, the test was good reflection of what had been taught and the knowledge which the teacher wanted his or her students

b a

Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah

State Islamic University of Sultan Syarif Kasim Ria

to know. It meant that, the researcher gave speaking test based on the curriculum at the second grade students of Islamic Senior High School Darul Hikmah Pekanbaru. Whereas, Construct validity concerns on whether the test is actually in line with the theory of what it means to the language (Shohamy, 1985:74).

Considering the performance test type was used in this research in collecting the data. The students were asked to perform storytelling in front of the class. The test was measured certain components based on the indicator. The researcher used five aspects in speaking ability because the aspects were based on the indicators in curriculum. Those were; fluency, pronunciation, vocabulary, grammar, and comprehension. The instrument and the scoring rubric of speaking could be seen in appendices.

3. Reliability of Questionnaire

The validity and reliability is related. It is possible for a test to reliable without being valid for specific purpose, but it is impossible a test to be valid without first being reliable. Hughes (1989, p. 20) states reliable test is consistent and dependable. If the same test is given to the same student or matched students on two different occasions, the test should yield similar result.

There are five types of reliability; stability, equivalence, equivalence and reliability, internal consistency, and rater agreement. This research is internal consistency reliability is the instrument administered once, using one version of the instrument and each

b a

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau

State Islamic University of Sultan Syarif Kasim Ria

participant in the study completes the instrument. The following table is the level of internal consistency of cronbach Alpha.

Table III.4 A Commonly Accepted Rule of Thumb for Describing Internal Consistency by Using Cronbach Alpha

| Consistency | by Using Cronbach Alpha |
|----------------|-------------------------------|
| Cronbach Alpha | Internal Consistency |
| > 0.90 | Very highly reliable |
| 0.80 - 0.90 | Highly reliable |
| 0.70 - 0.79 | Reliable |
| 0.60 - 0.69 | Minimally Reliable |
| <<<0.60 | Unnacceptably low reliability |
| | Source: Arikunto, 2006, p.115 |

To obtain the reliability of the questionnaire, the researcher used SPSS 22.0 program to find out whether the questionnaire reliable or not.

Table III.5Reliability Statistics of Test Questionnaire

| Cronbach's Alpha | N of Items |
|------------------|------------|
| 0,964 | 20 |

From the table above, it can be seen that the value of cronbach's alpha is 0,964. It means that the items were reliable, where the value of internal consistency was 0>0,9, so the reliability of the test questionnaire was very highly reliable.

G. The Normality Test

The normality test was used to know whether the distribution of the data was normal or not. Then, the researcher

0

Т

B ×

State Islamic University of Sultan Syarif Kasim Ria

used SPSS 22.0 for normality test. The following table showed the normality test for variable X "Students' Anxiety" and variable Y "Students' Speaking Ability".

Table III.6 Test of Normality

| | Kolmogorov-Smi | rnov ^a | | Shapiro-Wilk | | |
|----------------------|----------------|-------------------|-------------|--------------|----|-------|
| | Statistic | df | Sig. | Statistic | df | Sig. |
| Anxiety (X) | 0.156 | 30 | 0.059 | 0.894 | 30 | 0.006 |
| Speaking Ability (Y) | 0.130 | 30 | 0.200^{*} | 0.948 | 30 | 0.151 |

For normality test, if the significance level > 0.05, the data distribution was normal. From the table above, it showed that the sig. value is 0.156 for speaking anxiety and 0,130 for speaking ability. It could be concluded that the data distribution was normal. Therefore, the analysis of correlation forstudents' anxiety and students' speaking ability could be continued.

H. The Technique of Data Analysis

This research is quantitative design, the independent variable (X) and dependent variable (Y) are the two variables correlated.

In order to find out whether there is correlation between students' speaking interest and their speaking ability or not, the data analysed by using Pearson Product Moment formula. It calculated by using SPSS 22.0 windows program.

Product-moment correlation used for data measure on an interval ratio scale of measurement and it uses r as it symbol and SPSS application

BAB V

CONCLUSION AND SUGGESTION

Conclusion

The objective of this research is to find out whether there is a significant correlation between students' anxiety and their speaking ability. Based on an analysis on chapter IV, it presented with findings and discussions, which the conclusions are :

- 1. The students' speaking anxiety at the second year of Islamic Senior High School Darul HikmahPekanbaru is categorized into highlevel anxiety it can be seen from mean score of the students' speaking anxiety score was 65 and the majority of the students who got score between was 11 students with percentage 36.67%.
- 2. The students' speaking ability at the second year of Islamic Senior High School Darul Hikmah Pekanbaru is categorized into lowcategory/level it can be prooved by the calculation of speaking score from two raters, and it is found that mean score of students' speaking was 49.87% and the majority of them got score about 10.00-55.00 and it was categorized in lowlevel of speaking.
- 3. There is a significant correlation between students' anxiety and their speaking ability at the second year of Islamic Senior High School Darul HikmahPekanbaru. It can be seen from the previous explanation that sig. (2-tailed) value is 0.000. It can be stated that 0.000<0.05. if sig. (2-tailed) value smaller that 0.05 means that

67

null hypothesis (H_o) is rejected while the alternative hypothesis (H_a) is accepted. The value of negative correlation coefficient (r) is -0.695.

₿, Suggestion

Based on the conclusion above, the researcher would like to propose several suggestions for the students to practice English more in order to increase and improve the ability especially in speaking. The suggestions are as follows:

- It is suggest for students to increase their knowledge in English 1. especially for vocabulary and grammar, because it is an important materials to make their speaking more fluently.
- 2. For the English teachers, the researcher suggests to add some activities which can improve students' speaking ability such as role play, presentation, etc. when the students have good braveness to speak out and they will be easy to follow the learning process.
- However, the teachers have to pay attention to the students' self-3. anxiety that the teachers have to know which level of their students' speaking performance in learning English. So that, the teacher can plan what activities that will be conducted in the classroom. In addition, suggestion for further research, it can be investigated correlation between students' speaking anxiety with other English skills.

SPEAKING SCORING RUBRIC

| Hak cip | | S | PEAKING SCORING RUBRIC |
|---------|-----------|-------|---|
| a | | Score | Indicators |
| В | | 1 | Pronunciation frequently unintelligible |
| ilik | | 2 | Frequent gross errors and every heavy accent make understanding difficult, require frequent repetition. |
| | | 3 | "Foreign accent" requires concentrated listening and mispronunciations lead to occasional misunderstanding |
| sn | unciation | 4 | Marked "foreign accent" and occasional and mispronunciations which do not interfere with understanding |
| ka R | | 5 | No conspicuous mispronunciations, but would not be taken for a native speaker |
| | | 6 | Native pronunciation, with no trace of "foreign accent" |
| L | | | |

| | Score | Indicators |
|---------|-------|--|
| | 1 | Grammar almost entirely inaccurate except in stock phrases |
| | 2 | Constant errors showing control of very few major |
| | 2 | patterns and frequently preventing communication |
| | | Frequent errors showing some major patterns |
| Grammar | 3 | uncontrolled and causing occasional irritation and |
| | | misunderstanding |
| | | Occasional errors showing imperfect control of some |
| | 4 | patterns but no weaknesses that causes |
| | | misunderstanding |
| St | 5 | Few errors, with no patterns of failure |
| ate | 6 | No more than errors during interview |
| | | |

| | Score | Indicators |
|-----------|-------|--|
| | 1 | Vocabulary inadequate for even the simplest conversation |
| | 2 | Constant limited to basic personal and survival areas. |
| ocabulary | 3 | Choice of word sometimes inaccurate, limitations of vocabulary prevent discussion of some common professional and social topic |
| | 4 | Professional vocabulary adequate to discuss special interest; general vocabulary permits discussion of any non-technical subject with some circumlocutions |
| | 5 | Professional vocabulary broad and precise; general adequate to cope with complex practical problems and varied social situations |
| | 6 | Vocabulary apparently as accurate and extensive as that |
