Dear sir/madam

We would like to ask about our paper ID10412 title "A Design of Radial Line Slot Array Antennas (RLSA) Using the Specification of Panel Antennas", submitted on 22 june 2018

In your system, the status is Revisions Required 2018-07-27, however We could not find any revision instruction in the system, moreover we did not receive any email inform us about the revision and revision instructions.

Thank you for your explanation about the status of our paper

Regards,
Acc. Prof. Dr. Teddy Purnamirza, ST M.Eng

Dear Sir/Madam,

Your email has reached my queues safely, so i will get back in touch with you there as soon as i can. Just a heads up i might not get back to you straight away, as i answer all emails in order to keep things fair.

How to submit your manuscript

To make a submission, you must have a user account and be enrolled as an Author. User accounts can either be created by the Journal Manager or you can register yourself (this journal policy allow you create user account by your self as a Reader, an Author and/or a Reviewer). All fields with an asterisk beside them (Username; Password; Repeat Password; First Name; Last Name; Email) are mandatory. Your username and your email address must be unique; furthermore, while you can change your email address at a later date, you will be unable to change your username. If you want to register in another role within the same journal (for example, if you are already a Reader, but also want to become an Author) you can log in; go to Edit My Profile (under My Account on your User Home page); and check off the checkboxes next to any available roles, near the bottom of the page. Once you have an account, log in to the journal site and select the role of Author. The Author is asked to upload a submission file and to provide metadata or indexing information. (The metadata improves the search capacity for research online and for the journal.) The Author can upload Supplementary Files, in the form of data sets, research instruments, or source texts that will enrich the item, as well as contribute to more open and robust forms of research and scholarship.

Your paper ID?

Please ALWAYS put your paper ID number in the subject line of email communication when making inquiries. For example, if your submitted manuscript URL: <http://journal.uad.ac.id/index.php/TELKOMNIKA/author/submission/1234>, your paper ID number is 1234.

Your cooperation is very appreciated.

Thank you

Best Regards,
Tole Sutikno

Dear Prof/Dr/Mr/Mrs: Teddy Purnamirza:

We have reached a decision regarding your submission entitled "A Design of Radial Line Slot Array Antennas (RLSA) Using the Specification of Panel Antennas" to TELKOMNIKA (Telecommunication Computing Electronics and Control), a Scopus indexed journal, SCImago Journal Rank (SJR) Q3.

Our decision is to revisions required.
In preparing your final camera ready paper, you should pay attention to:

1. Authors should have made substantial contributions to:

-
- (a) the conception and design of the study, or acquisition of data, or analysis and interpretation of data
 - (b) drafting the article or revising it critically for important intellectual content

2. Introduction section

Explain the context of the study and state the precise objective
An Introduction should contain the following three parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

3. Results and Discussion

The presentation of results should be simple and straightforward in style. This section reports the most important findings, including results analyses as appropriate and comparisons to other research results. This section should be supported suitable references.

4. Conclusion

Your conclusion should make your readers glad they read your paper. Summarize sentences the primary outcomes of the study in a paragraph (NOT in numbering).

5. References and Citations

We usually expect a minimum of 25 and 40 references primarily to recent journal papers for research/original paper and review paper, respectively. Each citation should be written in the order of appearance in the text [1], [2], [3], [4], (Sequential order!!)
URGENT: SELF CITATION from same author or group authors is MAX 10%.

6. Paragraph

A paragraph is a sentence or group of sentences that support one main idea. Many authors have presented paragraphs in very long terms. Author should use simple sentences which are grammatically correct, but too many can make your writing less interesting.
Every paragraph in a paper should be:

- Unified: All of the sentences in a single paragraph should be related to a single controlling idea (often expressed in the topic sentence of the paragraph).

- Clear: The sentences should all refer to the central idea of the paper.
- Coherent: The sentences should be arranged in a logical manner and should follow a definite plan for development.
- Well-developed: Every idea discussed in the paragraph should be adequately explained and supported through evidence and details that work together to explain the paragraph's controlling idea.
