ABSTRACT

Firman Rizaldi, (2021): The Effect of Using Cartoon Videos as Media Instruction on Students' Speaking Ability at milik Senior High School 1 Kampar Timur

The study was aimed to find out whether there was a significant difference in the speaking ability between the tenth grade students of SMA N 1 Kampar Timur who were taught by using cartoons video as media instruction and those who were not, in the academic year of 2020/2021. This research was classified as a quasi-experimental study. It involved 65 students of two groups, Class X MIPA 35 as the experimental group and Class X MIPA 6 as the control group. The experimental group was taught by using cartoon videos, whereas the control group was taught by using the textbook-based technique. The data were obtained by using a pre-test and a post-test. The pre-test was given to both groups before the treatment and the post-test was given after the treatment. The data of the pre-test and post-test of both groups were analyzed by using descriptive and inferential statistics. The data were calculated by using a computer program, SPSS 25 for Windows. After the data were tested and found to be homogeneous and normal, the hypothesis was tested using the Kolmogrov-Smirnov test. The results of the research show that there was a significant difference in the speaking ability between the students who were taught by using cartoon video and those who were Laught by using the textbook-based technique. The significance value calculated 0.019 is bigger than 0.05 (sig value=0.109>0.05). Therefore, the hypothesis of this study is rejected. It means that there is no significant difference on students speaking ability who are taught by cartoon video as instructional media at the eleventh grade of senior high school 1 Kampar Timur.

ABSTRAK

Firman Rizaldi, (2021):

Pengaruh Penggunaan Video Kartun sebagai Media Pembelajaran terhadap Kemampuan Berbicara Siswa di SMA N 1 Kampar Timur

milik Penelitian ini bertujuan untuk mengetahui apakah terdapat perbedaan yang signifikan kemampuan berbicara antara siswa kelas X SMA N 1 Kampar Timur Yang diajar dengan menggunakan video kartun sebagai media pembelajaran dan oyang tidak, pada tahun ajaran 2020. / 2021. Penelitian ini tergolong penelitian eksperimen semu. Penelitian ini melibatkan 65 siswa yang terdiri dari dua kelompok yaitu Kelas X MIPA 5 sebagai kelompok eksperimen dan Kelas X MIPA 6 sebagai kelompok kontrol. Kelompok eksperimen diajar menggunakan video kartun, sedangkan kelompok kontrol diajar menggunakan teknik berbasis buku teks. Data diperoleh dengan menggunakan pre-test dan post-test. Pre-test diberikan pada kedua kelompok sebelum perlakuan dan post-test diberikan setelah perlakuan. Data pre-test dan post-test kedua kelompok dianalisis dengan menggunakan statistik deskriptif dan inferensial. Data dihitung dengan menggunakan program komputer, SPSS 25 for Windows. Setelah data diuji dan dinyatakan homogen dan normal, hipotesis diuji dengan menggunakan uji Kolmogrov-Smirnov. Hasil penelitian menunjukkan bahwa terdapat perbedaan yang signifikan dalam kemampuan berbicara antara siswa yang diajar menggunakan video kartun dan siswa yang diajar dengan menggunakan teknik berbasis buku teks. Nilai signifikansi yang dihitung 0,019 lebih besar dari 0,05 π (nilai sig = 0,109> 0,05). Oleh karena itu hipotesis penelitian ini ditolak. Artinya tidak ada perbedaan yang signifikan pada kemampuan berbicara siswa yang diajar dengan video kartun sebagai media pembelajaran di kelas XI SMA Negeri 1 Kampar Timur.

CHAPTER 1

INTRODUCTION

Background of the Problem

The center of communication is speaking. Speaking becomes a tool for producing and acquiring knowledge in any language. It is also vital in communication because humans utilize it practically every time they communicate with another human being. As stated by Arbain et.al (2017) The most significant skill for English learners to acquire is speaking collectively of the four talents in English. For many people, the success of learning a language is measured by how far the student can talk and communicate in the target language. Speaking, on the other hand, is frequently overlooked in the classroom.

According to Samira (2014) Speaking is that the active use of language to specific meaning, and for young learners, the speech is that the medium through which a brand new language is encountered, understood, practiced, and learnt. instead of oral skills being simply one aspect of learning language, the spoken form within the young learner's classroom acts because the prime source of acquisition. However, speaking problems will be major challenges to effective foreign acquisition and communication.

At senior high School 1 Kampar Timur, used curriculum 2013. The passing grade of English material is 75. Writer found the students still have problem in mastering speaking skills, especially in Pronounciation and vocabulary. Based on the interviewed result of the English teacher at senior

high school 1 kampar timur, the question was, "what are the problem of the students when their learning English especially speaking in simple present tense". The English teacher said, "the students had problems such as pronounciation and vocabulary.

Recognizing the speaking difficulty in SMA N 1 Kampar Timur, English teachers attempted to address it by using a variety of media to teach English, particularly to increase students' speaking through the use of picture stories and PowerPoint slides. However, their English speaking remained a problem.

In light of the aforementioned phenomenon, the researcher believes that the teacher should employ new media in order to improve the students' speaking abilities. The researcher proposed that Audio Visual media be used to meet this demand (Cartoon). Based on the interview with the English teacher, this kind of media have never been used in teaching by the teacher before

Based on the issue stated above, the writer attempts to improve students' speaking abilities through the use of cartoon videos. Audiovisual media includes cartoon videos. Based on Fitrona et.al (2016) Students view a short cartoon movie at the beginning of the class and then retell the story in pairs, which is an alternate strategy for teaching speaking to senior high school students. It is a good strategy that can be applied by the teachers because it provides some advantages. The use of cartoon movies can help the mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Dilarang

Hak Cipta Dilindungi Undang-Undang

State Islamic University of Sultan Syarif Kasim Riau

students to more understand and memorize the story before they are going to retell the story in front of the class.

Watching cartoons helps learners to boost their pronunciation, vocabulary and their speaking ability. The writer was interested in carrying out the research entitle: The Effect of Using Cartoon Videos as Media Instruction on Students Speaking Ability at Senior High School 1 Kampar Timur.

B. Problem of the Research

1. Identification of the problem

Based on that problem above, most of the students of eleventh-grade at Senior High School 1 Kampar Timur, still get some problem in speaking skills. To clear it's, the writer identified as follows:

- a. How some of the students were lacks of vocabulary in speaking?
- b. How some of the students were lacks of grammar in speaking?
- c. How some of the students were did not have confidence when speaking English? and
- d. How was the previous media still not effective enough to increase speaking skill of the students?

2. Limitation of the problem

By the identification problem above, it caused by the strategy that teacher used was less effective on students speaking ability. The students were difficult how to express their ideas by the themes that teacher gave. They also difficult in select the correct vocabulary, and

Suska

N neı

State Islamic University of Sultan

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

the correct grammatical. In this chance, the writer wants to make a limit about the problem of this research on the teaching method that the teacher used. The writer tried to use a method called cartoon video and the writer wants to know that the cartoon video could give a significant improvement and effect on the student speaking ability of the eleventh-grade students at the Senior High School 1 Kampar Timur.

3. Formulation of the Problem

Based on the limitation problem above, the problem above can be formulated as follows:

- a. How is the student's ability in speaking skills taught by using Cartoon Video as Media instruction at Senior High School 1 Kampar Timur?
- b. How is the student's ability in speaking skills taught without by using Cartoon Video as Media instructional at Senior High School 1 Kampar Timur?
- c. Is there any significant improvement and effect of using Cartoon Video as Media instruction at Senior High School 1 Kampar Timur?

1. The Objective of the research

a. To measure the students ability in Cartoon Video as Media instruction.

Cartoon Video as Media instruction. a. To measure the students ability in speaking skills taught by using Cartoon Video as Media instruction at Senior High School 1 Kampar Timur.

Sultan Syarif Kasim Riau

- Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
- b. To measure the student's ability in speaking skills taught without by using Cartoon Video as Media instruction at Senior High School 1 Kampar Timur.
- c. To find out whether there is or not a significant effect of using Cartoon Video as media instruction on student's speaking ability at Senior High School 1 Kampar Timur.

2. Significance of the Research

- This result of the study is expected to give a contribution to the English teachers to improve teaching speaking using video
- b. This study is expected to raise students' motivation in learning English, especially in speaking.
- The writer also hoped this research can be useful and valuable, especially for the teachers of Senior High School 1 Kampar Timur.
- d. Finally, the findings of this research are expected to give valuable contributions and information on using video in the English teaching-learning process.

State Islamic University **QD.** Definition of Key Term

To keep off a misunderstanding of the terms in this research, the writer provides definition of the terms in this research as follows:

1. Cartoon Video

According to Suparta (2016) Cartoon video is one of the media that can be used to interpret the learning message which include two elements namely audio and visual.

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Riau

2. Speaking skill

As an energetic skill, the speaking skill is Lai-Mei et.al (2017) one amongst the foremost important skills to be developed and enhanced as means of effective communication. Speaking skill is regarded one among the foremost difficult aspects of acquisition. Many language learners find it difficult to precise themselves in spoken communication. they're generally facing problems to use the foreign language to specific their thoughts effectively.

Based on Tanti (2015) Instructional media has several advantages in teaching English, especially in teaching English to young learners. There are several benefits in utilizing instructional media in teaching English.

State **Reason for Choosing the Title** lamic University of Sultan Syarif Kasim Riau

The writer has some reasons why the writer is interested in carrying out this research based on the following reason as follows:

- 1. The title of this research is involved with the writer status as a student English Education Department.
- 2. The problems in this research above are not yet investigated yet by the other writer
- 3. The facilities needed by the writer are available in the location of research

CHAPTER II

REVIEW OF RELATED LITERATURE

Theoretical Framework

1. The Nature of Speaking

Speaking is a valuable ability since it allows people to express themselves and share information with others. Speaking skill is particularly crucial in English learning, according to Fitrona et.al (2016), because it makes it easier for someone to convey information or ideas with others.

As Stated by Waode (2018), Speaking, on the other hand, mostly refers to the use of that language in communication. The success of speaking ability is determined by the frequency with which the language is used.cIn other words, speaking English fluently will be tough without practice. English has become the most important language of communication in one of the world's languages..

In both teaching and learning, speaking is considered a skill to practice and master. In this light, the author states, "Speaking is the productive oral skill." It involves developing a system of meaning-expressing verbal utterances. Based on Kamonpan (2010) Speaking is one among the four macro skills necessary for effective communication in any language, particularly when speakers don't seem to be using their first language. As English is universally used as a method of communication, especially within the internet world, English speaking skills should be developed together with the

milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

opposite skills in order that these integrated skills will enhance communication achievement both with native speakers of English and other members of the international community.

In addition, Speaking is not only one of the four skills which play a significant role for students in mastering English. It should be studied and practiced persistently. According to Brown (2004:141) there are five basic types of speaking or oral production where the students are expected to carry out in the classroom. They are imitative, intensive, responsive, interactive, and extensive.

- a. Imitative, is when someone is exclusively concerned in what is labeled by "Pronunciation". She or he imitates a native speaker's pronunciation.
- b. Intensive, is someone's ability to determine the meaning of the dialogue based on the context.
- c. Responsive, refers to someone's comprehension of the short dialogue, standard greeting and small talk, simple request and comment, and the like; and
- d. Interactive, is the interaction that's takes two forms. They are transactional language- the purpose of exchanging specific information, and interpersonal exchanges, which have the purpose of maintaining social relationship. It is little complicated than responding.

Hak cipta milik UIN Suska

Riau

Hak Cipta Dilindungi Undang-Undang

e. Extensive (monologue) is speech, oral presentation, and storytelling are all examples of considerable oral production in which the opportunity for oral involvement from listeners is either severely limited (possibly to nonverbal answers) or completely absent.

After then, speaking can be divided into three categories. based on Ibnu Khaldun (2019) in Richard (2008), there are

1) Speaking as Interaction

It stands for "conveisatio" and refers to engagement that is essentially social in nature.

When people meet, for example, they will exchange greetings and small conversation.

Then there's the notion of speaking as interaction:

- a) Opening and closing conversation
- b) Picking topic
- c) Making conversation
- d) Joking each other
- e) Etc

2) Speaking as transaction

It describes instances in which the attention is drawn to what is said or done. It implies that it is critical that others comprehend what we have communicated..

milik UIN Suska

Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

State Islamic University of Sultan Syarif Kasim Riau

3) Speaking as performance

It refers to public speech, such talking about information, announcement and speech

Speaking is a crucial element of learning and teaching a second language. However, in today's society, teaching speaking must focus on improving students' communicative skills so that they may express themselves and learn how to utilize their own languages., Moh et.al (2019).

2. The Component of Speaking Skill

According to Azlina et.al as cited in Vanderkevent (1990) there are three components in speaking:

a. The Speakers

Speakers are people who produce the sound. They are useful as the tool to express opinions or feelings to the hearer. So, if there are no speakers, the opinion or the feelings or the feeling won't be stated.

b. The Listeners

Listeners are people who receive or get the speaker's opinion or feeling. If there are no listeners, speakers will express their opinion by writing.

c. The Utterances

The utterances are the words or sentences that speakers use to express their opinions. Both the speakers and the listeners will use signs if there is no utterance.

There are many aspect that should be understand by the students.. According to Harris (1974:81), there are comprehension, grammar, vocabulary, pronunciation, and fluency.

1) Comprehension

For oral communication, it certainly requires a subject to respond, to speech as well as to initiate it. It is important to separate comprehension from production in tests of structure, this item type may have something to commend it, at least in tests for elementary-level learners.

2) Grammar

Students must be able to construct a correct sentence in conversation. grammar" tests at least on the high school and college levels have usually concentrated on matters of style and diction appropriate for rather formal written English.

3) Vocabulary

The necessary diction employed in communication is observed as vocabulary. One cannot communicate effectively or express their thoughts in both oral and written form without a sufficient vocabulary. Learners who have a limited vocabulary face another barrier to learning a language. Without grammar little may be conveyed, without vocabulary nothing are often conveyed. So, supported this explanation, the writer concluded that without mastering vocabulary sufficiently is English learners won't be able to speak English or write English properly. vocabulary could also be measured with pictures. Two forms of picture items have frequently been used.

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

4) Pronunciation

When students speak, they use pronounciation to create clearer language. It is concerned with the phonological process, which is a part of grammar that consists of the elements and principles that determine how sounds differ and pattern in a language. Phonemes and supra-segmental features are two aspects of pronunciation. From the statement above, the writer concluded that pronunciation is the knowledge of studying about how the words in a particular language are produced clearly when people speak. In speaking, pronunciation plays a vital role in order to make the process of communication easy to understand.

5) Fluency

The ability to read, speak, or write fluently, seamlessly, and expressively is referred to as fluency. To put it another way, the speaker is able to read, understand, and respond in a language in a clear and concise manner while also relating meaning and context. The ability to speak fluently and correctly is known as fluency. Many language learners strive for speaking fluency. A moderately rapid rate of speech and a small number of pauses and "ums" or "ers" are signs of fluency. These signs suggest that the speaker has not spent a significant amount of time looking for the language items required to convey the message. The writer concluded that fluency is another important component based on the ideas presented above. Fluency means the capability of someone speaks fluently and accurately with little using pauses like "ums" and "ers", and so on.

3. Assessment of Speaking Skill

Students' speaking ability will be examined using a speaking assessment modified from Arthur Hughes to determine how much their speaking competence has improved after being treated with various issue sticks.

Five components were developed in collaboration with FSI (Foreign Service Institute) and have a ratting range of 1-6 with varied weighting points from lowest to maximum. The speaking measurement contains of some component elaborated from students skill including their pronounciation, grammar, vocabulary, fluency, and comprehension based on Ibnu Khaldun (2019) in (Hughes ,2003).

4. Teaching Media Instruction

a. Definition of Teaching Media Instruction

Text, photos, video, television, and books are examples of media. Media is a communication channel that refers to anything that transmits information from the source of information to the receiver of information.

Sadiman (1986) in Tanti (2015) defines instructional media as "anything utilized to transfer information from the sender(s) to the receiver(s) to arouse learners' curiosity and encourage them to learn."

In regard to the above concept, Reisser and Dick (1996) in Tanti (2015) proposed that instructional media might include all traditional methods of teaching (teachers, chalkboards, textbooks, and other written materials) as well as new instructional media (CD Room, computer, interactive video and

Hak cipta milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

multimedia system). In this study, instructional media are defined as tools used in educational setting to deliver the materials, information to reach effective teaching-learning.

According to Azlina et.al as cited in Harris (1974) There are (seven) forms of instructional media: realia; pictures; course book; boards; OHP; flipcharts; and computer based-technology.

1) Realia

According to Rosdiana (2017) Realia is a term for real media or concrete objects that will used in the classroom to build background knowledge and vocabulary.

2) Pictures

One example of graphic materials is pictures and drawings. "non-photographic" Graphic materials are "twoor dimensional materials" that combine "symbolic visual" and verbal information to convey messages and information. Drawings, charts, graphics and also cartoons are kinds of this media. Pictures can be used for several purposes, such as drills. communication, understanding, ornamentation, prediction and discussion.

3) Course-book

Course-book evaluation checklists available made for making material selection and evaluation process easier and systematic. As distinct from many other checklist

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

© Hak cipta milik UIN Suska Riau

State Islamic University of Sultan Syarif Kasim Riau

development studies, their study attempts to suggest an eclectic checklist by using items from quite different evaluation instruments available in the literature, Rizky (2016).

4) Boards

According to Hamdi (2015) using whiteboard supports classroom management through motivating learners to participate in classroom activities. The use of interactive board enhances learners' engagement in the classroom which facilitates classroom management. This study focuses on the impacts interactive whiteboard makes on classroom management.

5) OHP

Teachers should use overhead projectors, also known as OHPs, to demonstrate a variety of things on overhead transparencies. By using OHP the Teacher easily to explain the material and the student will easy to understand the material.

6) Flipcharts

A flip chart is one of the learning media that developed by utilizing the used calendar to be more efficient. The main purpose of this research is to improve students' learning

milik UIN

Suska

Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

State Islamic University of Sultan Syarif Kasim Riau

outcomes. Flipchart design is a form of visual medium that is chosen and is part of the learning strategy, Aziz (2020)

7) Computer-Based Presentation Technology

Educational media consists of two main components: hardware and software. Furthermore. these media, is defined because the merging of two or more media elements consisting of text, graphics, images, photographs, audio, video, and animation during a fully integrated way. Multimedia is divided into two categories; namely, linear multimedia and multimedia. the employment of multimedia could be a type of learning supported by different sources of knowledge (e.g. text and graphics) being handled jointly so as to know and memorize a given content, Kadaruddin (2017).

5. The Nature of Cartoon Videos

a. Definition Cartoon Video

There are several definitions of cartoon video. Cartoon movie is one of the media that can be used in teaching speaking. According to Canning and Wilson (2000), in Suparta (2016) Students' curiosity might be piqued and piqued by watching a cartoon movie.

By witnessing visual performances of the speakers and listening to their voices, this media could assist pupils in interpreting the message expressed. Therefore, the students can adjust the spoken language to the mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Hak Cipta Dilindungi Undang-Undang

Dilarang

) Hak cipta milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

pictures that are animated. It will make them easy to catch and remember the spoken language. A video is the recording, the reproducing or broadcasting of moving visual images.

According to Suparta (2016) cartoon video is one of the media that can be used to interpret the learning message which include two elements namely audio and visual.

Experts have given many definitions of animation, but they all agree that animation is a series of drawings or images made by a computer. However, collions cictionary also states that animation is the process of making films in which the drawings or puppets appear to move. Furthemore, Oxford dictionaru says that animation is the manipulation of electronic images by a computer in order to create moving images.

b. Types of Cartoon Videos

There are many different types of cartoon movie resources available. One form of cartoon movie can be used by the teacher to aid in the teaching and learning process. He or she can, however, choose the type of cartoon movie that will be shown in the classroom and is appropriate for teaching purposes

According to Lonergan (1985), in Suparta (2016) The following groups of cartoon movies can be found: first, cartoon movie recordings of specialists' films and television programs. The second category includes

17

milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

domestic television broadcast cartoon movie recordings. Last but not least, there are animated film records of language training broadcasts and films..

c. Use of Cartoon Videos in Teaching Speaking

When teaching by using cartoon movie, the teacher have to know the techniques. According to Rice (1993), in Suparta (2016) He adds that while using cartoon video to teach, there are four techniques: First, let's do a freeze frame, The silent viewing is the second option The third is solely based on sound. The fourth step is to look at the jigsaw puzzle. The last option is standard viewing..

By using cartoon movie in the classroom, the students can increase their vocabulary and pronunciation. The lessons may help students become more interested in the teaching-learning process. On the other hand, Yassaei (2012) in Rasyid (2016) adds that cartoon movie can be used to teach grammar, vocabulary and creative writing.

d. The Advantages of Using Cartoon Videos Teaching Learning **Process**

By using cartoon movie in the classroom, the students can increase their vocabulary and pronunciation. The lessons may help students become more interested in the teaching-learning process. The benefits of using cartoon video in the classroom according to Rice (1993) in Suparta (2016):

- 1) Cartoon video brings native speakers as a model for students to get interesting in pronunciation, intonation and register,
- 2) Cartoon video can raise an interest in learning English and

milik UIN

Suska

Riau

Hak Cipta Dilindungi Undang-Undang

mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

State Islamic University of Sultan Syarif

Rasim Riau

- make the students interested in understanding people interaction,
- 3) Cartoon video can increase the students' understanding more than just listening to the audio,
- 4) Through cartoon video, students will be more active in classroom activities because cartoon movie is related to their life contraction,
- 5) Cartoon video drives the cross-cultural awareness by viewing the fiction figure of people on the screen and compare them with real characters such friends and family,
- 6) Cartoon video is better in describing a process, if necessary by using a slow motion, and finally, E
- 7) Each students can study something from the cartoon movie, from the clever one or less intelligent.

The Benefits of Using Videos in Teaching Learning Process

There are some several benefits of using videos in teaching learning process, the students will be more interested to the learning process because the students rarely watch video in school. The students also curious to the new way of teacher to teach them.

Relevant Research

There are some relevant researches which have relevancy to this research. The first title is "The Use of Cartoon Movie In Improving Students

milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Speaking Ability in Using in Using Expression Of Asking For And Giving Help". That was conducted by Herwinda Puspitasari, Eusabinus Bunau, Dewi Novita (2012). Their research design was A Pre-Experimental Study, which was appropriate method to be used to solve the problem of this research. The location of the research was SMP Negeri 6 Pontianak. In which participants were seventh grade students of SMP Negeri 6 Pontianak in academic year 2012/2013. This study was conducted to know whether or not cartoon movie can improve the ability in using expression of asking for and giving help. Based on the research finding of the study, it can the said this research there was an improvement of students' score in posttest after applying cartoon movie as the media in teaching speaking in using expression of asking for and giving help.

The second title is "Using Cartoon Movie to Improve Speaking Skill". That was conducted by Rasyid Supatrta (2016). His research was an Experimental Research by using one group pre-test and post-test design. The location of the research was SMU Abulyatama Aceh Besar. In which participants were 47 students. This study was conducted to know whether teaching speaking through use of cartoon movie can improve the student speaking ability or not. Based on research finding of the study, it can be said this research showed that students speaking improved after teaching by using cartoon movie as media.

The third title is "The Use of Animation Videos to improve Students Speaking Skills". That was conducted by Cut Irma Yunda Rahmadani,

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber

Hak cipta

milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

Sofyan A. Gani, and Nira Erdina (2020). Their Research was an Experimental Study by using pre-test and post-test design. The location of their research was SMP N 16 Banda Aceh. In which participants were 5 classrooms and each class consist of 20-25 students. The findings of the research proved that there was statisfically differences in students achievement in speaking skill before and after using animation videos as a media in teaching speaking.

The fourth title is "The Use of Animation Video to Improve the Student Speaking Skill". This research was conducted by Satriani Sappe (2020). His research was an pre-experimental research by using pre-test and post-test design. The location of his research was SMP N 1 Sungguminasa. The finding of the research with the scoring classification of the students pre-test and post-test.

The fifth title is "The Effect of Using Animation Video on Student Speaking Ability at SMK PGRI Pekanbaru". This research conducted by Hardianti (2020). Her research was an experimental research by using pre-test and post-test design. The location of her research was SMK PGRI Pekanbaru in which participants were 8 classes each class consist of 22-36 students. This study conducted to know there is or there is no significant effect by using animation video on student speaking skill.

Operational Concept

Operational concept is used to give restriction to the theoretical framework on order to avoid misinterpretation and misunderstanding in this research. In carrying out this research, it is important to clarify shortly the

Hak cipta milik UIN Suska

Riau

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

variables used in analyzing the data. In this research there are two variables, they are (1) the effect of using Cartoon Media as variable X and (2) students speaking ability as Y variable. To quantify each variable the writer identifies them into some indicator as follow:

1. The Procedure of Using Cartoon Media (Variable X)

For many students, Cartoon movies are more attractive, interesting, and impressive than common material printed in books or audible material in tape, because of the visual nature and immediacy of the media, the writer implemented cartoons videos to the students as media instruction. According to preliminary research by the writer the procedure of using cartoon media that the writer used are:

Pre-Teaching

Pre-teaching activity is the opening of the teaching and learning process. In this stage, the teacher greets the students and prays together with them and then checks students' attendance. After that, the teacher leads the students to do brainstorming by asking the students questions to recall the previous lesson; it can also help the teacher to make sure that the students are ready to study. The teacher also gives motivation by telling them the goals of the lesson and competencies that should be reached by the student at the end of the lesson. This pre-teaching activity spends time about 10 minutes.

b. While-Teaching

There are three phases that researcher used, there are:

milik UIN

Suska

N neı

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber: Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah

- 1) Show the students the cartoon videos and let them to watch it until the end.
- 2) And then, the writer explain about the simple present tense material with Power-Point Slide
- 3) After that, the writer done the question and answer with the students one by one

Post-Teaching

The post-activity was employed to look into the student product such as the video that the students made.

Indicator of Students Speaking Ability (Variable Y)

Student speaking ability serves as dependent variable, it is symbolized by "Y". according to (Brown 2004) the successful aspect of speaking activity, such as:

- a) Fluency, Has complete fluency in the language such that his speech is fully accepted by educate- native speakers
- b) Pronouciation, Equivalent to and fully accepted an educated native speaker
- c) Grammar, Equivalent to that of an educated native speaker.
- d) Comprehension, Equivalent to that of an educated native speaker
- e) Task/Details, Speaking proficiency equivalent to that of an educated native speaker.

Hak Cipta Dilindungi Undang-Undang

Assumption and Hypothesis

1. The Assumption

Based on this research, after looking at the theories and possibilities described in the theoretical framework and operational concept, the writer has a strong assumption that the better cartoon media is applied, the better result of students speaking ability will be.

2. The Hypothesis

Based on the assumption above, the writer formulates two hypothesizes as follows:

There is no significant effect of using Cartoons as Media instructional on students speaking ability at Senior High School 1 Kampar Timur.

There is significant effect of using Cartoons as Media instructional on students speaking ability at Senior High School 1 Kampar Timur.

CHAPTER III

RESEARCH METHOD

Research Design

This study falls into the category of quasi-experimental studies. According to Creswell (2008) Experimental Research is used when the writer wants to establish possible cause and effect between the independent and the dependent variables. The pre-test and post-test construction was used in the study. It was a pre-test and post-test intact group design with a group of students in the experimental group and a group of students in the control group.

Based on Creswell (2008), Quasi Experimental design is tested and idea (or practice or procedure) to find out whether its influence an outcomes ort dependent variables. Video was used to make the experimental group a special treatment. The control group was given the traditional method without video, which is textbook-based, as is normally done by the instructor.

The independent variable and the dependent variable were both used in the study. The treatment, which had two levels, was the independent variable. The experimental group received video treatment, while the control group received traditional treatment. Meanwhile, the students' speaking abilities were the dependent variable. The academic design is shown in the table below.

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Table 3.1: The Design of the Research

| Group | Independent Variable | Dependent variable |
|--------------------|------------------------|--------------------|
| Experimental Group | Video Technique | Students Speaking |
| | | Ability |
| Control Group | Conventional Technique | Students Speaking |
| | | Ability |

The Location and Time of the Research

This research was conducted from January to February 2021. This research was conducted at Senior High School 1 Kampar Timur in Academic year 2020/2021

C. Subject and Object of the Research

The subject of this research is the first year of the students of Senior High School 1 Kampar Timur. While the object of this research is to know there is/there is no significant effect of using Cartoon Video as Media Instruction on speaking ability at student of Senior High School 1 Kampar Timur.

Population and Sample of the Research

1. Population

The target of the population of this research is the first year of students at Senior High School 1 Kampar Timur. They consist of 2 classes and 65 students they are X MIPA 5 and X MIPA 6.

Hak cipta milik UIN Suska Riau

State Islamic University of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Table 3.2 **The Number of Students**

| Class | Number of Students |
|----------|--------------------|
| X MIPA 1 | 32 |
| X MIPA 2 | 32 |
| X MIPA 3 | 35 |
| X MIPA 4 | 33 |
| X MIPA 5 | 34 |
| X MIPA 6 | 31 |

Due to certain constraints, it absolutely was insufferable to use the whole population as a sample. As an exploration sample, the writer used two classes. Cluster sampling was utilized in this study. Cluster sampling divides the whole population into groups or clusters. Following that, a random sample of those clusters is taken, and every one of them are employed in the ultimate sample (Wilson as cited in Hamed 2010). Cluster sampling is helpful for writer whose subjects are dispersed across vast geographic areas because it saves them time and money (Davis as cited in Hamed 2005). The stages to cluster sampling are often summarized as follows:

- a. Choose cluster grouping for sampling frame, such as type of company or geographical region
- b. Number each of the clusters
- c. Select sample using random sampling

The writer took two classes as the experimental class and the control class with Puliing out Lottery, the writer wrote the classes name in the paper, and the writer scramble that paper and choosed 2 papers randomly. After the

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber.

Riau

sampling selection, X MIPA 1 was selected as the experimental class and X MIPA 2 as the control class.

2. Sample

Table 3.4
The Research Sample by Class

| Class | The Number of Class |
|----------|---------------------|
| X MIPA 5 | 34 |
| X MIPA 6 | 31 |

The sample above was divided into two groups. The first group was X MIPA 5 class as the experimental group and the second group was X MIPA 6 class as the control group. The experimental group was given the videos method in as the control group. The experimental group was given the video method in for every meeting based on the school-based curriculum. The control group was given the same materials but without using video in their speaking activities. The students read from the book and the teachers gave short explanation. Then, the students made a conversation with their peer to present it in front of the class. The table below shows the distribution of treatment in the research.

Table 3.5
The Distribution of the Treatment

| The Distribution of the Treatment | | | | | | |
|-----------------------------------|----------|--------------|------------|--|--|--|
| Group | Class | Treatment | Number odf | | | |
| | | | Students | | | |
| Experimental | X MIPA 5 | Video | 34 | | | |
| Control | X MIPA 6 | Conventional | 31 | | | |

mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

Riau

State Islamic University of Sultan Syarif Kasim Riau

Technique of Data Collection

The technique of data collection that is used in this research is:

Firstly, the students made a simple present tense video for the pretest, and then the writer gave a cartoon video as a treatment of this research, after that the students made a simple present tense video again as the posttest.

Pre-test and post-test: the writer collected the data by giving pre-test to students in the term of simple present video to respondent before treatment in the term of cartoon videos and post-test after treatment with collected simple present videos.

Validity and Reliability of the Data

1. Validity

If an instrument can measure what should be measured, it is considered accurate. It has the ability to clarify data derived from variables that have been thoroughly researched. Content and construct validity were used as validity criteria in this analysis. Before instruments tested to students, they were consulted with expert (the supervising lecturer) whether the instruments were appropriate or not to measure the research variables.

Hak cipta

milik UIN Suska

Riau

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber

State Islamic University of Sultan Syarif Kasim Riau

2. Reliabilty

After having tested the validity of the instrument, the next step is to examine the reliability. A test is considered reliable if the same test is given to the same subjects or matched subjects in two different occasions, instrument reliability was estimated by using Cronbach Alpha reliability test. Based on the results, the value of α was 0.815. The table shows that the instruments used in this study have a high level of reliability.

G. Technique of data Analysis

Descriptive research involves collecting data in order to answer the questions concerning the current status of the subject of the study. There were two techniques of analyzing the data of this research, namely descriptive and inferential statistics. In the descriptive analysis, there were two formulas used in the computation; the mean and the standard deviation analysis. In the inferential statistics, this research used test of normality, test of homogeneity, and test of hypothesis. The data will be analyzed by using independent sample t-test, based on Pallent (2010) an independent sample t-test was used when we want to compare the mean score on some continuous variable for two different groups of subject, to find out whether there is or there is no significance difference between two or more variables can be analyzed by using sample ttest by using SPSS (statistical product and service solutions) 21.0 version program. The formulation as follow:

$$Eta^2 = \frac{t^2}{t^2 + (n_1 + n_2) - 2}$$

Where:

Hak cipta

milik UIN Suska

RH.

State Islamic University

of Sultan Syarif Kasim Riau

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber.

t = t value

 n_1 = number of students in first group

 n_2 = number of students in second group

statistically the hypothesis is:

 $H_a = to > t$ -table

 $H_0 = to > t$ -table

Homogenity Test of the Data

The test was wont to understand wheter or not the sample variance was homogeneous. Homogeneity of variances occurs when population distributions have similar dispersion, writer are getting increasingly curious about the properties of their data other than central tendency, like dispersion, as an example, hypothesized that self-reported personality scores would have similar variability across contol class and experimental class, examined whether the variability in validity coefficients in self-report tests for a specific construct was equivalent to the variability in validity coefficients in psychomotor tests evaluated by an external rater of the same construct.

Normality Test of the Data

This test aimed to find out wheter or not the collected data showed a normal distribution. This Research use Kolmogorov-Smirnov test. The Kolmogorov-Smirnov test was first derived by Kolmogorov (1933) and later modified and proposed as a test by Smirnov (1948). If the P-values (significance) is less than $\alpha = 0.05$, the data were not normally distributed, otherwise if the *P*-values is more than $\alpha = 0.05$ then the data is normally

CHAPTER V

CONCLUSION AND SUGGESTION

Conclusion

Based on the data analysis explained in chapter IV, finally, the writer would like to expose the conclusion as follows: The score of students' speaking ability who did a pretest without using Cartoon video as media instruction at senior high school 1 Kampar Timurr was getting mean score 61.48. It concluded that the students' speaking ability was categorized "low".

The score of students' speaking ability who did posttest by using cartoon videos as media instruction at senior high school 1 kampar timur was getting mean score 64.76. It concluded that the students' speaking ability was categorized "Low". From the analytical formula of Paired sample T-test, it was found that sig. value for experimental class was 0.200 and for control class was 0.200. it can be stated that 0.200>0.05. It means the null hypothesis (H_a) was rejected, while the alternative hypothesis (H_o) was accepted. In other words, there was not any significant effect of using Cartoon Video as Media Instruction at senior high school 1 Kampar Timur.

Suggestion

After finding the result of the Effect of Using Cartoon Video as Media Instruction at senior high school 1 Kampar Timur.the writer would like to give some suggestion to the teacher and the for the next researchers

State Islamic University of Sultan Syarif Kasim Riau

1. Suggestions for The Teacher of English

As an alternative to many other methods in the teaching and learning process, the instructor may use Cartoon Videos as media Instruction for teaching. Many activities from this approach can be used by the teacher in teaching speaking ability, especially information-transfer activities. Using this approach, the instructor encourages students to be more engaged, involved, and confident. They know how to transfer information from visual information and then translate it into words on their own to reveal what they know. As a result, this exercise in speaking class benefits students not only in terms of speaking capacity, but also in terms of critical thinking. Furthermore, using Cartoon Video as Media Instruction would greatly enhance the teacher's experience in the classroom.

2. Suggestions for The Next Researcher

This study is one of the ways to help students develop their speaking skills. There are a variety of approaches, processes, tactics, and techniques that can be used to help students develop their speaking abilities. As a result, the writer will have to come up with a new approach to help and enhance learning activity. In conclusion, the witer needs a validation of nest writer that has the same topic

There are six components of speaking to be scored; pronunciation, grammar,

| 0 | | to be sected, pronunciation, gran |
|----------------------------|-------------------|--|
| _ | ulary, fluency, o | comprehension and task as Brown (2004:172) has stated. |
| cipta milik UIN Suska Riau | | |
| 20 | | PRONOUNCIATION |
| <u> </u> | 5 | Equivalent to and fully accepted an educated native |
| = | | speaker |
| | 4 | Errors in pronunciation are quite rare |
| Z | 3` | Errors never interfere with understanding and rarely |
| S | | disturb the native speaker. The Accent may be |
| S | | obviously foreign. |
| × 00 | 2 | Accent is intelligible though often quite faulty. |
| 70 | 1 | Errors in pronunciation are frequent but can be |
| <u>a</u> . | | understood by a native speaker used to dealing with |
| | | foreigners attempting to speak his language. |

| GRAMMAR | | | | |
|---|---|--|--|--|
| 5 Equivalent to that of an educated native speaker. | | | | |
| 4 | Able to use the language accurately on all levels normally pertinent to professional needs. errors in grammar are quite rare. | | | |
| 3 | Able to use the language accurately on all levels normally pertinent to professional needs. errors in grammar are quite rare. | | | |
| 2 | Can usually handle elementary constructions quite accurately but Does not have thorough or confident control of the grammar | | | |
| 1 | Errors in grammar are frequent, but the speaker can be understood by a native speaker used to speak his language. dealing with foreigners attempting. | | | |

| | VOCABULARY |
|---|--|
| 5 | Speech on a level is fully accepted by educated native speakers in all its features including breadth of vocabulary and idioms, colloquialisms, and pertinent cultural references. |
| 4 | Can understand and participate in any conversation within the range of his experience with a high degree of precision of vocabulary. |
| 3 | Able to speak the language with sufficient vocabulary to participate effectively in most formal and informal conversations on practical, social, and professional topics. Vocabulary is broad enough that he rarely has to grope for a word. |

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber: 9 Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.

milik UIN Suska Riau

State Islamic University of Sultan Syarif Kasim Riau

| | 2 | Has speaking vocabulary sufficient to express |
|------------|--|---|
| 0 | | himself simply with some circumlocutions |
| 工 | Speaking vocabulary inadequate to express anything | |
| 7 | | but the most elementary needs |
| <u>C</u> . | | |
| 10 | | |
| ω | | |

| Г | | | | | |
|---|--|--|--|--|--|
| | FRLUENCY | | | | |
| 5 | Has complete fluency in the language such that his | | | | |
| | speech is fully accepted by educate- native speakers | | | | |
| 4 | Able to use the language fluently on all levels | | | | |
| | normally pertinent to professional needs. Can | | | | |
| | participate in any conversation within the range of | | | | |
| | this experience with a high degree of fluency. | | | | |
| 3 | Can discuss the particular interest of competence | | | | |
| | with reasonable ease. Rarely has to grope for words. | | | | |
| 2 | Can handle with confidence but not with facility | | | | |
| | most social situations, including introductions and | | | | |
| | casual conversations about current events, as well as | | | | |
| | work, family and autobiographical information. | | | | |
| 1 | (No specific fluency description. Refer to the others | | | | |
| | four language areas for implied the level of fluency.) | | | | |

| COMPREHENSION | | | | | |
|---|---|--|--|--|--|
| 5 | Equivalent to that of an educated native speaker | | | | |
| 4 | Can understand any conversation within the range of | | | | |
| | his experience. | | | | |
| 3 | Comprehension is quite complete at a normal rate of | | | | |
| | speech | | | | |
| 2 Comprehension is quite complete at a norm | | | | | |
| | speech | | | | |
| 1 | Within the scope of his very limited language | | | | |
| | experience, can understand simple questions and | | | | |
| | statements if delivered with slowed speech, | | | | |
| repetition, or paraphrase. | | | | | |

| TASK | | | | | |
|------|--|--|--|--|--|
| 5 | Speaking proficiency equivalent to that of an | | | | |
| | educated native speaker. | | | | |
| 4 | Would rarely be taken for a native speaker but can | | | | |
| | respond appropriately even in unfamiliar situations. | | | | |
| | Can handle informal interpreting from and into | | | | |
| | language. | | | | |
| 3 | Can participate effectively in most formal and | | | | |
| | informal conversations on practical, social, and | | | | |
| | professional topics. | | | | |
| 2 | Able to satisfy routine social demands and work | | | | |
