# First screening #1570691471, entitled: Design and performance of a hydrokinetic system in Indonesia

- IJPEDS for writing format and style

  - min 25 references primarily to journal papers
- 

Dear Mrs. Zulfatri Aini,

We have reached an initial screening phase regarding your paper submission #1570691471 entitled "Design and performance of a hydrokinetic system in Indonesia" to "International Journal of Power Electronics and Drive Systems (IJPEDS)". The International Journal of Power Electronics and Drive Systems (IJPEDS), p-ISSN: 2088-8694, e-ISSN 2722-256X is a SCOPUS indexed Journal (<https://www.scopus.com/sourceid/21100258382>), SJR Q2 on Electrical and Electronics Engineering, CiteScore: 1.49, SJR: 0.304, and SNIP: 1.088. The scope of the journal includes all issues in the field of Power Electronics and drive systems.

Our decision is: Revisions Required before review process

A high quality paper should have:

- (1) a clear statement of the problem the paper is addressing;
- (2) the proposed solution(s); and
- (3) results achieved. It describes clearly what has been done before on the problem, and what is NEW.

The goal of your first revision is to describe NOVEL technical results.

Please note that there are four (4) types of technical results:

- (1) An algorithm;
- (2) A system construct: such as hardware design, software system, protocol, etc.;
- (3) A performance evaluation: obtained through analyses, simulation or measurements;
- (4) A theory: consisting of a collection of theorems.

Your revisions should focus on:

- (1) Describing the results in sufficient details to establish their validity;
- (2) Identifying the novel aspects of the results, i.e., what new knowledge is reported and what makes it non-obvious;
- (3) Identifying the significance of the results: what improvements and impact do they suggest.

The main goal of this stage is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed.

Original/Research paper should be presented with IMRaD style/model:

1. Introduction
2. The Proposed Method/Algorithm/Procedure specifically designed (optional).  
Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).
3. Research Method
4. Results and Discussion
5. Conclusion.

We will usually expect a minimum of 25 to 30 references primarily to journal papers, depending on the length of the paper. You can find our published papers to enrich your references at:

- <http://beei.org>
- <http://ijece.iaescore.com>
- <http://ijeecs.iaescore.com>

- <http://ijra.iaescore.com>
- <http://ijaas.iaescore.com>
- <http://ijape.iaescore.com>
- <http://ijict.iaescore.com>

to improve your paper.

Submit your revised paper within 14 days, and do serious work for updating your paper (upload as new review paper version). Revised paper submission is submitted (as author version) on the same paper ID number through EDAS online system. When your revised paper reached us, it will be sent for single blind peer review by at least three reviewers who will either be members of the Editorial Board or others of similar standing in the field, for contribution, originality, relevance, and presentation. Then, your paper will be judged for final decision of acceptance or rejection.

We look forward to receiving the revised version of your manuscript and are delighted that you chose to send this important work to this journal.
