Reviewer A:

Title- Abstract- Summary :

1. Title is so good, but does not describe the purpose of the research. The purpose of this research is to only provide factors that have an impact on graduation time, not to the decision-making process.
2. abstract can be better by removing sentences that do not support this research (such as the second sentence) and replaced with an explanation of the parameters of the data used, such as the number of data classes and so on

Introduction and Literature Review :

1. Great job on the introduction part, really love it. But I'm a little disturbed by the writing format, where there are a lot of punctuation marks that are out of place (such as the second paragraph of the first, fifth, and sixth sentences) and you must follow the citation format for two or more references (third paragraph second sentence)
2. you should be able to provide a more focused explanation of the method you used in each stage of this research (such as method or how from step of data
