IMPORTANT!!  
=====  
For ORIGINAL/RESEARCH PAPER: the paper should be presented with IMRaD model:  
1. Introduction  
2. Research Method  
3. Results and Discussion  
4. Conclusion.  
We will usually expect a minimum of 30 references primarily to journal papers. Citations of textbooks should be used very rarely and citations to web pages should be avoided. All cited papers must be referenced within the body text of the manuscript.

For REVIEW PAPER: the paper should present a critical and constructive analysis of existing published literature in a field, through summary, classification, analysis and comparison. The function and goal of the review paper is:  
1) to organize literature;  
2) to evaluate literature;  
3) to identify patterns and trends in the literature;  
4) to synthesize literature; or  
5) to identify research gaps and recommend new research areas.  
The structure of a review paper includes:  
1. Title – in this case does not indicate that it is a review article.  
2. Abstract – includes a description of subjects covered.  
3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus

In preparing your revised paper, you should pay attention to:

1. Please ensure that: all references have been cited in your text; Each citation should be written in the order of appearance in the text; The citations must be presented in numbering and CITATION ORDER is SEQUENTIAL [1], [2], [3], [4], .....

Please download & study our published papers for your references:

- <http://ijece.iaescore.com>
- <http://ijeecs.iaescore.com>

(Please use "Search" menu under "JOURNAL CONTENT" menu in right side of the site)

- 2 An Introduction should contain the following three (3) parts:
  - Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
  - The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
  - The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are cited in this section.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate. You should present the comparison between performance of your approach and other researches. Results given in figures should not be repeated in tables. It is very important to prove that your manuscript has a significant value and not trivial.

Dear Journal Manager,  
We, the team of article writers with Paper ID# 25759, are pleased to thank you for accepting the article to be published in the journal that you manage. Based on the information we received through the OJS system and email, we have to finalize a number of things, including publication costs, proof of similiarity and final articles. As a good writer and a sign of gratitude, here we attach the three files.  
For your cooperation, the writing team would like to thank you for this opportunity.

NB:  
Details of publication costs:  
Based on the information in the Author Fees that the publication fee of USD 325 (~IDR 4900K) covers an eight (8) page standard manuscript. Because our article totals 14 pages and is outside the set standards. Finally, we add up the fee for the next 6 pages multiplied by (~IDR 800K) per page for a total of (~IDR 4800K). So, the total fee we paid was (~IDR 9700K).
