Technology is expected to increase student motivation to learn. The development of technology today shows its advantages by becoming a basic need in the world of Education (Sari, Sinaga, &; Suyanti, 2021). Technology can support the learning process of students to be more

CHAPTER I

INTRODUCTION

Burns and Joyce (1997) defined Speaking as an interactive process

of constructing meaning that involves producing, receiving, and

processing information. Speaking plays an important role in English

lessons. Speaking as a productive skill requires the use of audio material

and the brain to create language through sound. Furthermore, the purpose

of speaking is to communicate effectively. In many situations, people

often judge a person's language proficiency by speaking rather than by

be used to increase vocabulary, improve Pronunciation and word structure

(Jaelani & Sutari, 2021). The Duolingo application is already widely used

around the world. The Duolingo application provides interesting learning

strategies so that it is not boring. There are many different types of

exercises in the Duolingo app for Speaking, Reading, Writing and

Listening skills as well as improving pronunciation, building grammar and

Duolingo is one of the free English learning applications that can

other language skills (Putri & Refnaldi, 2020).

State Islamic University of Sultan Syarif Kasim Riau done (Molin &Blanco,2019). State Junior High School 4 Langgam is one of the schools in Langgam as a formal educational institution. This school is located in Pangkalan Gondai. State Junior High School 4 Langgam used Merdeka Curriculum. The Merdeka curriculum is a form of learning that provides opportunities for students to learn in a calm, fun and unpressured manner so that students can adjust to their competencies and talents (Rahayu, 2022). English lessons in junior high school during Merdeka Curriculum are 2 lessons or 70 minutes in a week. In learning speaking, the teacher has

interesting. In the current era, almost all learning uses technology.

Technology is very important in education because it allows teachers and

students to carry out learning both remotely and closely so that students

language skills and the skills often associated with speaking in duolingo

application are reading and listening. There are two types of speaking

presentation forms in duolingo including Speaking with Listening and

Speaking with Reading. The type of speaking exercises in the duolingo

application seem fewer compared to the other tasks and do not appear

consecutively but randomly. This is also called integrative speaking.

applied duolingo application to help students speak English very well. Eighth grade students have experienced using this duolingo application in English learning activities because they have used the duolingo application since grade seven.

Based on the results of the researcher observation regarding students' perceptions of the used of the Duolingo application in speaking activities at SMPN 4 Langgam, it was found that some students still lacked confidence when speaking English in front of the class but some other students said that duolingo provided an improvement in their English. Some of the problems that make these students have difficulty in speaking or having conversations, the main factor is the lack of absorption. Some other students also mentioned that before they used the duolingo application they had limited vocabulary so students were afraid of being wrong in grammar, pronunciation, and intonation. The next problem is that students use their mother tongue more during class so their English is not developed. In this study, the researcher needs to explor to investigated students' perception using the duolingo application in speaking activities.

There are many studies on duolingo and speaking with different methods, however, the author also found several studies on duolingo and vocabulary such as research by Erfiani (2022), Sapril Siregar (2019), Cecep Abdul Fatah (2019), Resti Dwi Jayanti (2022), Amelya Risky (2022) with experimental methods. Fiqi Khotimah (2021) uses duolingo and speaking with mix method research. then, Laila Mahmudah (2015)

uses duolingo and pronunciation with quasi experiment method. while this research uses duolingo and speaking activities with quantitative descriptive method. Recognizing the above phenomenon, to build on previous research and to explore Duolingo in more depth. This study focuses on students who use Duolingo to learn English, whether this famously fun app is positive or negative based on students' perceptions. All of the above variables are based on students' perceptions after using the Duolingo app in learning English. The researcher chose Duolingo because it is an interesting and easy-to-use application. Duolingo can be accessed anytime and anywhere, not only in the classroom. Duolingo is considered an application that has several advantages to help students in learning. By measuring students' perceptions of the duolingo application, it will certainly be known that this duolingo application can make a difference to students' speaking or not.

Based on the problem above, the researcher is interested in conducting research entitled Students perception on using the Duolingo application.in Speaking Activities in state junior high school 4 Langgam.

State Islamic

Based on the background above, researchers identified several

CHAPTER 2

LITERATUR REVIEW

∃A. Theoretical Framework

1. Students Perceptions

a. The Nature of Perception

The result of someone's observation of something is called perception. Perception is a process by which a person provides responses or information to others. According to Robbins & Judge (2008, p.175) Perception is defined as the process by which individuals interpret and organize their sensory impressions to give meaning or impression to the environment.

Walgito (2010, p.53) eveals that perception is a process of organizing, interpreting the stimulus received by the organism or individual so that it becomes something meaningful, and is an integrated activity within the individual. Based on this, the feelings, thinking abilities and experiences that individuals have can differ from one individual to another when evaluating a given stimulus.

According to Davidoff (1988, p.273), perception is a complex and active way of working or process, as it depends on the sensory system and the brain. For people, perception is a flexible strategy that may help them feel better about themselves in the face of unfavorable circumstances. In daily life, it seems that

9

experience of information content, which we can compare to previous experiences, as well as how we see or understand something using one of our senses. From the above definitions, it can be concluded that perception is the process of interpreting individuals to obtain information through the five senses. Perception is also referred to

people have the ability to satisfy themselves while yet being

considerate of others and their environment. Perception is our

as a form of thought that regulates patterns of human attitudes and interactions that are carried out continuously with the environment.

b. Indicator of perception

According to Bimo Walgito (2010, p.54 -55), perception has three indicators as follows:

a) Absorption

From the results of absorption or acceptance by the five senses will get the ideas, responses, or impressions in the brain. The ideas can be single plural, depending on the object of perception observed.

b) Understanding

After there are ideas or impressions in the brain, those ideas become organized, is classified, compared and interpreted, thus forming understanding. The understanding process is unique and quick. The understanding that is formed also

depends on old ideas that the individual has previously had. This is called perception.

c) Assessment or evaluation: After understanding clearly can we evaluate the individual. Individuals compare the resulting understanding with subjective criteria or standards that belong to them. Each person's assessment is different even though the object is the same. Therefore, perception is personal.

Researchers agree with Bimo Walgito that perception indicators consist of three points, namely absorption, understanding, and assessment (evaluation). These perception indicators are very useful for students' perceptions of speaking activities using duolingo.

c. Type of Perception

According to Irwanto (2002) there are two types of perception as follows:

1. Positive Perception

Positive perception is an assessment or personal view of something that is by following per under positive expectations.

2. **Negative Perception**

> Negative perception is a view or assessment of something that does not negatively match expectations and expectations in a negative way.

Suska

R

a

State Islamic University of Sultan Syarif Kasim Riau

Two types of perception are positive perception and negative perception. In this study, positive perception is students who agree that using duolingo application can make students' speaking better than before. And negative perception is students who disagree that using duolingo application can make students' speaking better than before.

The factors Affecting Perception d.

According to Lindawati (2021), two factors affect a person's perception namely:

- 1. Internal factors: physical condition, feelings, attitudes and personality, attention, prejudice, desire or hope, learning, values and needs, motivation, mental disorders, and interests.
- External factors include the knowledge and demands of the 2. opposite ward, family history, information learned, intensity, size, repetitions, new and familiar objects, and information obtained.

Process of Perception e.

According to Sobur (2003), there are three main components of the process of perception, those are:

- 1. Selection: Selection is the sensory screening process of external stimulation, intensity, and type that can be many or little.
- 2. Interpretation: Interpretation is the process of arranging information such that it makes sense to a particular person.

Interpretation is affected by such factors as experience, intelligence, motivation, personality, and value systems adopted. The ability to classify information received that is, the transformation of complicated information into simple information is another factor that influences interpretations.

3. Interpretation and perception

Interpretation and perception are then interpreted. Into behavior as a reaction. So, perception is the process of selecting, interpreting, and collecting information that comes in.

From the perception process, it can be concluded that the perception process is divided into 3 namely selection, interpretation and interpretation and perception.

Students Perception f.

different perceptions. Every person has Students' perceptions in the learning process are very important. Because the use of the duolingo application for speaking ability requires the opinions of students who have used it both at school and outside school. Therefore, each student has their own perception of the duolingo application.

Student perception in learning refers to the way students perceive something that is given or applied when carrying out a learning activity. Teachers can use students' subjective opinions to review, evaluate and discuss any system, method or subject matter

2. Speaking Activities

a. The Nature of Speaking

We need to socialize in life with both locals and visitors because we are social beings. Communicating with other people is one approach to socialize with them. The environment is made more comfortable by effective communication. Speaking is one of the forms of communication that we can use to personally or over the phone communicate ideas and information.

According to Brown (2004) speaking is a productive skill that can be done directly and empirically observed, these observations are always colored by the accuracy and effectiveness of listening skills. Burns and Joyce (1997) defined speaking as an interactive process of constructing meaning that involves producing, receiving, and processing information. Thornbury (2005) speaking is an important component of the English language learning curriculum that is closely related to Listening. So, speaking will bring students to gain new experiences while listening will help students in gaining new knowledge and ideas.

Thus, speaking is a crucial language ability in English that is used for both direct and indirect communication. Speaking and listening abilities are two language talents that work together to make new ideas more effective.

Students' lack of interest in English makes them feel difficult. According to Harmer, (2008) says that there are three events for students to speak in class:

- 1. Speaking activities, the teacher provides opportunities for students to practice speaking by giving exercises about their activities whether it is in daily activities, holidays and so on.
- 2. Give speaking tasks by trying to use any or all of the vocabulary they know and the teacher and other students give feedback. It can be seen how successful they are and also what problems they are having.
- 3. Using elements gradually so that they become language users themselves. This means they can use words and phrases fluently without much thought.

According to Brown (2004, p.144) there are some basic types of speaking, which are as follows:

- 1) Imitative: one of the kinds of speaking performance is just to make an imitation of words or phrases, or sentences.
- Intensive: The most frequently used type of speech 2) assessment is the production of stretches of spoken language designed to demonstrate competence in small groups of grammatical, phrasing, lexical, or phonological

1. Vocabulary

a collection of words made for Vocabulary is communication and increase one's knowledge in a language. Vocabularies refer to single words or chunks of words that are arranged to make a language meaningful. Students will find it difficult to communicate if they do not have enough language vocabulary (Sari, & Aminatun, 2021). Vocabulary is very important in language because it can create a better language. Because vocabulary is the basis of language, vocabulary is needed in learning Speaking, Reading, Writing and Listening.

2. Pronunciation

Pronunciation is the act of pronouncing words correctly to form a sentence that makes meaning in each utterance. To avoid misunderstandings in Pronunciation which is a sound, the meaning in language speech is used including articulation, stress and intonation which refers to the standard of truth and acceptance (Agustina, & Khunaifi, 2021).

3. Grammar

Grammar is one of the aspects used to organize vocabulary so that it becomes a sentence that fits the context. Thornbury (2005) says that grammar for speaking purposes is a grammar system that supports speech quickly and in real time. However, using grammar can hinder students' learning

especially in speaking which will make students afraid to speak because it is not in accordance with the grammar.

4. Fluency

According to Saraswat (2016) fluency is the soul of all languages including English. Fluency is a great booster to be more confident. Fluency is also assessed in speaking lessons in all languages. According to Chambers (1997), fluency can be defined as the speech rate. So fluency is how quickly we master the language we are learning. Fluency means being able to communicate without having to stop and think too much.

5. Comprehension

Comprehension is a way to find out the extent of a person's learning level. Understanding is a challenge for students in English and foreign language lessons.

c. The Importance of Speaking

Speaking is an important skill in English language teaching (Luoma, 2004). As a communication tool, speaking is one of the language skills that students and society must master. Speaking is very important because it is a means of communication that is spoken orally with pressure and intonation that is easy to understand. According to Richards, J. (2008), an important dimension of conversation is to use existing speech styles according to specific circumstances. So it is very important that we

use different styles of speech and look polite towards friends, parents and young children.

Based on the results above, the researcher concludes that speaking is a way to communicate to someone through oral. Speaking is also defined as oral expression that not only uses the voice but also uses appropriate pressure, rhythm and intonation. There are several Component of speaking that are needed students' English learning, namely vocabulary, pronunciation, grammar, fluency, comprehension and accuracy. In addition, speaking is also one of the most important skills for education and society.

3. Duolingo Application

a. Nature of Duolingo

Duolingo is a free online application available on the App Store. Duolingo has been widely used as an English learning media because of its interesting features. Duolingo is a free app created by Luis Von Ahn and Severin Hacker in November 2011. In 2012 the duolingo application was launched by Carnegie Mellon University Professor Luis von Ahn and CMU doctoral at the end of the year. Teske (2017) states that Duolingo is an online language learning platform launched in 2012 that provides many different languages in the world. Most people download the duolingo application from people who want to learn world languages

d. Using the Duolingo application in Speaking Activities

Speaking in Duolingo is one of the practice activities where users can practice and match their spoken and written sentence or words. Speaking Duolingo is a Speaking activity combined with other languae skills and the skills often associated with speaking in duolingo application are reading and listening. The type of speaking exercises in the duolingo application seem fewer compared to the other tasks and do not appear consecutively but randomly. However, the speaking tasks will increase at the nex level (Hirschi, 2020).

There are two types of speaking presentation forms in duolingo including Listen, than Speak and Read, than Speak. These two exercises have different modals but with the same goal of speech accuracy. In the use of Read, than Speak there is a sentence

Figure 11.10 Read, then Speak

Duolingo is a popular language learning app, and its speaking exercises are designed to help you improve your pronunciation and speaking skills in your target language. Here's a general procedure for speaking activities on Duolingo:

- 1) Select the Lesson: Choose a lesson or module that includes speaking exercises. Duolingo offers a variety of languages, so make sure you're working on the language you want to practice.
- 2) Begin the Exercise: Start the exercise, and you'll typically encounter sentences or phrases in your target language. You may need to translate, repeat, or complete sentences.

- 3) Microphone Access: Ensure that Duolingo has access to your device's microphone. This is necessary for speaking exercises. The app will usually ask for this permission if it's not already granted.
- 4) Speak Aloud: When prompted, read the sentence or phrase out loud in the language you're learning. Focus on pronunciation and clarity.
- 5) Accuracy Assessment: Duolingo will assess your pronunciation and speech accuracy. It may use voice recognition technology to check if you've spoken correctly.
- 6) Feedback: Duolingo often provides instant feedback on your pronunciation. If you didn't pronounce a word correctly, the app may offer suggestions for improvement.
- 7) Repeat as Necessary: If you don't get it right the first time, don't worry. You can repeat the exercise until you feel confident with your pronunciation.
- 8) Completion: Finish the exercise and continue with other lessons or modules in Duolingo.

Based on the results of a survey conducted by U.Imtinan, V.Chang and T.Issa (2013). It was found that there are five aspects measured from Student Perceptions of the Use of Duolingo Application for learning speaking English, namely:

1. Usability, Measures the extent to which students find the Duolingo interface easy to use in speaking activities.

29

There are many previous studies are relevant to this research. Here

1. The first research was conducted by Pangkuh Ajisoko (2020) with the

title "The Use of Duolingo Apps to Improve English Vocabulary

Learning". In pangkuh's research which focuses on exploring the use

of the Duolingo application in improving student vocabulary at the

University of Borneo Tarakan. This study involved 10 students as

samples with 30 days of practicing the duolingo application using

"regular" practice intensity (20 xp per day). The research instruments

are tests and questionnaires to answer the research questions. Based

on the quantitative data, the students' scores improved. The results are

expected to provide information for teachers and students in

conducting extensive language learning practices in a practical form.

research titled "The Effectiveness of Duolingo in Improving

Students' Speaking Skill at Madrasah Aliyah Bilingual Batu School

Year 2019/2020" The result of Hafifash's research showed that the

use of Duolingo application can give a positive effect to improve

students' speaking skill at the tenth grade students in MA Bilingual

Batu school year 2019/2020. The data of this study was analyzed by

using t-test. Based on the statistical calculation with the significance

level 5%, it showed that to = 2.881 is higher than tt = 1.672.

2. The second research was conducted by Hafifah (2021) with the

are some relevant studies, including the following:

Therefore, it can be concluded that using of Duolingo application as a media technology may implemented in the school.

- 3. The third research was conducted by Kiki Andriani (2023) with the research titled "The Effect of Guessing Game Technique on Students' Speaking Ability of The Tenth Grade at Senior High School 12 Pekanbaru". The purpose of this research to find out whether there was a significant difference of using and without using Guessing Game Technique on Students' Speaking Ability of the Tenth Grade at Senior High School 12 Pekanbaru. The result of the data analysis showed that the tailed value was 0.200, which is greater than 0.005, and the sig (2-tailed) value was 0.00, which is smaller than 0.005. Thus, it can be concluded that there was a significant difference of using guessing game techniques on students' speaking ability of the tenth grade level at Senior High School 12 Pekanbaru. The instrument used in this research was a test (pre-test and post-test) containing the speaking activity related to describing someone.
- 4. The fourth research was conducted by Hairunnisa (2023) with the research titled "students' perception on using duolingo application in increasing english learning motivation". The present study was conducted to describe students' perception on using Duolingo application in increasing English learning motivation. The study employed a mixed method using questionnaires and semi-structured interviews as data collection. Descriptive statistical analysis was used

Suska R Sultan Syarif Kasim Riau to analyze the data from the questionnaire, and the flow model by Miles and Huberman was used to analyze data from semi-structured interviews. The findings indicated that the students in this study like and enjoy using Duolingo to learn English because of the features, usability, content, context, control, and connectivity & mobility in Duolingo. Besides that, they stated that the features of Duolingo increase their motivation to learn English.

The difference between Pangkuh's research and this research was he used a pre-experiment research and the researcher used descriptive quantitative. The similarity is both of the researchers talked about Duolingo Application. The difference between Hafifah's research and this research was she used quasiexperimental study as the method of his research and this research used descriptive quantitative. The similarity is both of the researchers talked about speking and duolingo. The difference between Kiki's research and this research was she used quantitative with a quasi-experimental design and this research used descriptive quantitative. The similarity is both of the researchers talked about Speaking. The difference between Hairunnisa's research and this research was she used mixed method and this research used descriptive quantitative. The similarity is both of the researchers talked about Perception students using duolingo application to english learning.

CHAPTER III

RESEARCH METHOD

TA. Research Design

This research used a quantitative research as the research method. According to Sugiyono (2018), the data with numbers or extrapolated quantitative data is referred to quantitative data. Then Goertzen (2017), defined that quantitative research is a type of research that focuses on data that can be measured numerically to assess information, objectively and the results of the data can be evaluated using statistical analysis. Creswell (2014) defines the quantitative approach as a research method that uses post-positive claims to develop knowledge and collects statistical data in a fair and objective manner using predetermined instruments.

Furthermore, this research used descriptive quantitative as the research design. Khaldi (2017) stated that descriptive quantitative research, as the name suggests, helps the researcher to collect data about conditions, situations, and events that occur in the present.

B. Time and location of the research This research was conducte

This research was conducted on December 2023. The research took place at State Junior High School 4 Langgam which is located on Jl. Lintas Gondai Penarikan, Pangkalan Gondai, Kec. Langgam, Kab. Pelalawan, Riau, 28381.

C. Subject and Object of the Research

The subject of this research is all eight students State Junior High School 4 Langgam. The object of this research is the Students' Perception using the Duolingo application in Speaking Activities in State Junior High School 4 Langgam.

~ **_D.** Population and Sample of the Research

1. Population

According to Sugiyono (2010), the population is a generalization area consisting of object or subject that have certain qualities and characteristics that are determined by researcher to be studied and then draw conclusion. The population of this study was class VIII students at State Junior High School 4 Langgam. Researcher used all grade VIII students as the population because the eighth grade had previously used the duolingo application.

	Table II Population of th

35

target population. In this research, the researcher used total sampling to

select sample. Total sampling is a technique that uses when all members of

population are used as sample (Sugiyono, 2017, p.142) The reason for used

total sampling is that if the total population is less than 100, the entired

population is sampled. The researcher took the eighth grade as a sample

because this class is a class where all students have used the duolingo

To collect the data from the sample participant, the researcher used a

To simplify the data gathering procedure, the researcher using

closed-ended questionnaires administered using paper form and distribute

it to students. Data collection procedures were conducted in one meeting.

The researcher distributed questionnaires to students to fill in. After the

students filled in the questionnaires, the researcher asked them to collect

them back. The questionnaire was used to measure students' perceptions

using the Duolingo application in speaking activities has two categories

based on Irwanto (2002) which includes 20 statements, namely 10

positive statements and 10 negative statements of student perceptions of

the use of Duolingo which contains several elements in the Duolingo

application (Usability, Content, Context, control and Connectivity &

mobility) These statements were adapted from previous research conducted by U.Imtinan, V.Chang and T.Issa (2013).

Table III.2

Blue P	rint of	the	Test
--------	---------	-----	------

:			Number of	Statements		
No	Indicators		statements -	Positive	Negative	
No 1	Usability		4	1,2	11,12	
2	Content		4	3,4	13,14	
3	Context		4	5,6	15,16	
4	Control		4	7.8	17,18	
5	Connectivity mobility	&	4	9,10	19,20	
	TOTAL		20	10	10	

Every question or statement in the questionnaire have five answer choices. The answer from the respondent writter by giving the checklist on the available questionnaire, there are Strongly Agree, Agree, Neutral, Disagree, Strongly Disagree. For positive (favorable) items, "Strongly Agree" was given score 5, "Agree" was given score 4, "Neutral" was given score 3, "Disagree" was given score 2 and "Strongly Disagree" was given score 1. Meanwhile, for negative (unfavorable) items, "Strongly Agree" was given score 1, "Agree" was given score 2, "Neutral" was given score 3, "Disagree" was given score 4 and "Strongly Disagree" was given a score 5.

			(0.1.1)			

(Sugiyono (2014)

The questionnaire in this instrument used Likert Scale. According to Sugiyono (2014) claimed that the Likert Scale is used to measure attitudes, opinion and perceptions a person or group of people about social phenomena. Likert Scale used to scoring perception of students. Students' perception can be said to be positive if the most answer are strongly agree, and perceptions can be said to be negative if the most answer are in strongly disagree choices.

2. Validity

According to Gay et al. (2012), validity refers to the degree to which a test measures what it is supposed to measure and, as a result, allows for appropriate score interpretation. The validity test aims to illustrate whether the research instrument that has been made is valid or not to be used in conducting research. The validity test was carried out before the questionnaire was distributed to the research instrument. Before starting the research, the questionnaire was given to 31 students who were not part of the research sample. After that the questionnaire
