ACKNOWLEDGMENT

In the name of Allah, the most Gracious and Merciful, praise belongs to Allah almighty. With his guidance and blessing, the researcher has accomplished the final research paper entitled "The Implementation of Two Stay Two Stray Learning Model in Student Learning Activity at SMPN 2 Tebing". It is a scientific writing to fulfill one of the academic requirements to finish the bachelor's degree (S. Pd) at the Department of English Education Faculty of Education and Teacher Training State the Islamic University of Sultan Syarif Kasim Riau. Then, shalawat and salam are always presented to the last messenger of Allah, prophet Muhammad SAW who has inspired and lightened many people worldwide.

Appreciation and sincere thanks to my beloved parents, Raja Muhammad hanafi and Raja Hidayah, who has devoted all love and affection as well as moral and material attention. May Allah SWT always bestow grace, health, and blessings in the world and in the hereafter for the kindness that has been given to the researcher. Thank you so much Dad, Mom for everything you gave me. Thanks to the help of various parties. Especially the author's extended family, especially those whom the author loves, cherishes, the author's brother and sister Raja Fairus and Raja Kholifah and not forgetting the aunts Raja Amrilah, Raja Rabtah and Raja Zurnariyah and the author's uncle Raja Muhammad Thahir who sincerely and endlessly provide wholehearted prayers and support during the author's education at UIN Suska Riau.

The researcher would like to show her gratitude to all the beloved people who have encouraged motivated and even helped the researcher finish the paper. They are:

Prof. Dr. Hairunas, M. Ag., the Rector of the State Islamic University of Sultan Syarif Kasim Riau; Prof. Dr. Hj, Helmiati, M. Ag., as Vice Rector I; Dr. H. Mas'ud Zein, M. Pd., as Vice Rector II; Prof. Edi Erwan, S. Pt.,

ABSTRACT

RAJA RADHIAH, (2024): THE IMPLEMENTATION OF TWO STAY TWO STRAY LEARNING MODEL IN STUDENT LEARNING ACTIVITY AT SMPN 2 TEBING

The purpose of this study was to determine how the application of the two stay two stray learning model in student learning activities in English Language Education lessons at SMPN 2 Tebing. Data regarding the application of two stay two stray learning model was obtained by using observation sheet. The subject of this research is all English Education teachers at SMPN 2 Tebing, while the object of research is the application of two stay two stray learning model in students' learning activities at SMPN 2 Tebing. The population of this research was all 4 English Education teachers at SMPN 2 Tebing. Sampling in this study used purposive sampling technique, which is sampling done because there are certain criteria in the population. Data collection was done through observation and documentation. The result of this research shows that the application of two stay two stray learning model in students' learning activities at SMPN 2 Tebing is categorized as good with a percentage of 76, 78%.

ABSTRAK

RAJA RADHIAH, (2024): PENERAPAN MODEL PEMBELAJARAN TWO STAY TWO STRAY DALAM KEGIATAN BELAJAR SISWA DI SMPN 2 TEBING

Tujuan penelitian ini adalah untuk mengetahui bagaimanakah penerapan model pembelajaran *two stay two stray* dalam kegiatan belajar siswa pada pelajaran Pendidikan Bahas Inggris di SMPN 2 Tebing. Data mengenai penerapan model pembelajaran *two stay two stray* diperoleh dengan menggunakan lembar observasi. Subjek penelitian ini adalah seluruh guru Pendidikan Bahasa Inggris di SMPN 2 Tebing, sedangkan objek penelitian adalah penerapan model pembelajaran *two stay two stray* dalam kegiatan belajar siswa di SMPN 2 Tebing. Populasi dari penelitian ini adalah seluruh guru Pendidikan Bahasa Inggris yang berjumlah 4 orang di SMPN 2 Tebing. Pengambilan sampel pada penelitian ini menggunakan teknik *purposive sampling*, yakni pengambilan sampel yang dilakukan karena ada kriteria tertentu di dalam populasi itu. Pengumpulan data dilakukan melalui observasi dan dokumentasi. Hasil penelitian ini menunjukan bahwa penerapan model pembelajaran *two stay two stray* dalam kegiatan belajar siswa di SMPN 2 Tebing dikategorikan baik dengan angka presentase 76, 78%.

CHAPTER I

INTRODUCTION

A. Background of the Problem

The teaching and learning process is an activity performed by teachers and students who support each other to transfer knowledge. To improve learning outcomes, teachers design activities that can facilitate students to learn new knowledge or values through a process. Wildhan et al (2020) as nicited by Rahman et al (2023) said that without the initiative or efforts of = teachers, interaction cannot be produced easily and naturally. Teachers must constantly engage and motivate students to participate actively in classroom interaction. In the teaching and learning process, the problem of students activities is at the centre of attention. Whatever activities the teacher does is nothing but an effort to make the environment pleasant for all students and can stimulate student learning so that students are active in the learning process.

The learning function is not only the function of the teacher, but also other learning resources used for learning. Learning is organised by teachers to teach learners to acquire and process knowledge, skills and attitudes. Various kinds of active learning models can be applied in the learning process. According to Damayanti et al (2018), learning will be more meaningful if learning process places students as the main character in learning. Teacher does not longer be the center of learning, but involving students actively in every learning activity.

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip

karya tulis

I

Learning is a process of change, namely changes in behavior as a or result of interaction with the environment in meeting their life needs. These changes will be evident in all aspects of behavior. According to cognitive understanding, learning is a process of effort involving mental activity that coccurs in humans as a result of the process of active interaction with the environment to obtain a change in the form of knowledge, understanding, behavior, skills, and attitude values which are relative and lasting (Anwar, π 2017).

A highly effective teacher depends on the selection and use of learning models that are compatible with the purpose of the lesson. Therefore, it is necessary to use a variety of learning models in order to create changes in learning that are effective and enjoyable for the students. For this reason, one of the learning models that can be applied in the English learning process is the use of the cooperative learning model. Isjoni (2007) as cited by Damayanti et al (2018) said that cooperative learning is a learning model that has been used to actualize students oriented learning and teaching activity, especially to solve problems in activating students who cannot work together with other people, agressive students, and indifferent students.

One of the models that can be applied in student learning activities is the TSTS learning model. The learning process that must be able to actively involve all students is the use of the Two Stay Two Stray (TSTS) learning model. According to Sudrajat et al (2018) the TSTS learning model is a way for students to share their knowledge and experiences with other groups.

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip

karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah

I According to Lie (2002), TSTS is a technique that gives a student o chance to share their ideas, arugumention and information to other group. In this technique there are some activities. Then by using this technique, thes student helps each other in teaching learning process. The high level and low —level student will work together to achive the purpose of their group.

According to Firman et al (2020) TSTS model is a learning model in the form of group discussions. This discussion method is quite popular and is noften used by teachers in the learning process. This discussion method is an = activity that allows students to seek information, share information, opinions, questions and answers, and experience elements on a regular basis and does not require much direction from the teacher. The use of cooperative learning model TSTS will lead students to be more active to process information both in discussions, frequently asked questions, search for answers, explaining and listening to the material described by a friend, so that the problems of the learning process described earlier will be facilited, by applying the model lesson students are expected to cultivate knowledge in mastering the material (Harahap et al, 2017).

At SMPN 2 Tebing, English is a compulsory subject taught for four hours a week, with 40 minutes for one hour. For the curriculum itself, this school uses two curriculum, namely the Merdeka Belajar curriculum for class VII while classes VIII and IX still use the 2013 curriculum. To achieve the curriculum objectives set by the school, teachers must be able to choose an interesting learning model that can meet the curriculum objectives.

dan menyebutkan

lak Cipta Dilindungi Undang-Undang

Dilarang mengutip

I SMPN 2 Tebing is one of the schools that has used the TSTS learning nodel in student learning activities at school. As the results obtained by the researceh when interviewing the English teacher at the SMPN 2 Tebing, the TSTS learning model has been implemented by the English Education teacher _in English lessons.

Based on the researchers' observation process, learning at SMPN 2 Tebing by using TSTS learning models that there are obstacles in the learning process such as the number of students who do not understand the material conveyed by educators through TSTS learning, there are teachers who have just implemented the TSTS learning model and still have difficulty mastering it. The researcher is interested in various topics, including: (1) How accurate is the description of the TSTS learning model as an application choice that may be used to the greatest extent possible. (2) How does TSTS learning model employ study in English learning.

Based on the background of the problem above, the researcher would like to conduct a research by the title "The Implementation of Two Stay Two Stray Learning Model in Student Learning Activity at SMPN 2 Tebing"

B.º Identification of the Problem

Based on the background and conclusion described earlier, the problems in this study can be identified as follows:

1. the number of students who do not understand the material conveyed by educators through TSTS learning

2. there are teachers who have just implemented the TSTS learning model and still have difficulty mastering it. The researcher is interested in various topics.

C. Limitation of the Problem

Based on the identification of the problem above, this study focused on the implementation of TSTS learning model in English Learning at SMPN 2 Tebing.

D. Formulation of the Problem

Based on the limitation of the problem, the problem of this research can be formulated as follow: what are stages of implemented by the teachers in using TSTS learning model at English Lesson at eight grade of SMPN 2 Tebing?

E. Objective of the Research

The objective of this research is to explore the stages of implement by the teachers in using TSTS learning model English Learning at eight grade of SMPN 2 Tebing.

F. Significance of the Research

Sultan

The results of this study can be useful for:

- 1. For students, through learning the Two Stay Two Stray model it is hoped that it can increase students learning activeness.
- 2. For teachers, this research is expected to broaden knowledge and experience regarding the Two Stay Two Stray learning model so that it can be used as an alternative to increase students learning activeness.

Dilindungi Undang-Undang

ak

łak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis

ini tanpa mencantumkan dan menyebutkan sumber karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah

3. For researchers, this research is expected to increase knowledge and experience in research and teaching. As a reference for students teacher candidates so that they can have good quality in learning variations.

G. Definition of the Term

1. Learning Model

Learning model is a form of learning that is illustrated from beginning to end which is presented characteristically by the teacher. In other words, a learning model is a wrapper or frame of the application of an approach, method, strategy, and learning technique (Helmiati, 2012).

2. The Two Stay Two Stray Learning Model

According to Putra et al (2020), The Two Stay Two Stray type of cooperative learning model which is applied to provide opportunities for groups to share results and information with other group.

CHAPTER II

LITERATUR REVIEW

Theoritical Framework

1. Learning Model

The learning model is a conceptual framework that is used as a guide in carrying out learning activities. With the use of models, learning can be more directed, easy to understand, and mastered by students. Hence, the use of models in learning must be in accordance with the theory being taught, the goals to be achieved, and the environment and students must also be considered (Ahyar et al. 2021)

According to Helmiati (2012), learning model which discusses how to teach students with various variations so as to avoid boredom and create a comfortable and pleasant learning atmosphere. a comfortable and pleasant learning atmosphere is created. The way and model of teaching in the classroom is generally influenced by the teacher's own perception of teaching and learning. If a teacher has the perception that teaching is conveying knowledge, then in teaching the teacher tends to place students as a container that must be filled by the teacher. In practice, the teacher explains the lesson and the students pay attention.

According to Aji (2016) as cited by Albina et al (2022), In learning with a variety of models can be used as an alternative, which can choose the appropriate learning model to be applied, suitable and effective to achieve educational goals. A good educator is a teacher who always strives

Hak milik \equiv uska

to create the best learning conditions for their students. learning conditions that are best for their students. In creating the best learning, educators choose learning models and are required to be in accordance with what their students will learn.

2. Understanding TSTS Learning Model

The learning model is basically a form of learning that is illustrated from start to finish which is presented by the teacher. According to Mulyati (2023), one of the efforts used by a teacher or teacher is to develop teaching and learning activities to be even better. One of them is using an interesting learning model that can generate student activity and student learning outcomes, so that the learning process is more alive. One learning model that can involve all students is the cooperative learning model.

Cooperative learning is a strategy with small groups of students with various degrees of abilities. A cooperative learning model has various forms of learning strategies. The use of cooperative learning model aeffectively on teaching and learning activities in the classroom and supported by learners' learning interests are accommodated well, it is hoped that students can understand the subject easily and the learning result is increasing (Sudrajat, 2020).

One of the learning models used to solve problems in this problemis the TSTS learning model. According to Diaz et al (2020), Two Stay Two Stray learning model, "Two stay two guests" developed by

N

Hak milik UIN Suska

Dilarang mengutip sebagian atau seluruh penulisan

Spencer Kagan. The TSTS learning model is a learning that is not only focused within the group itself, but also between groups through discussion by sharing the results of group activities. In this TSTS model, students in groups are given the opportunity to share the results of discussions or information with other groups. TSTS comes from the English language which means two stay two guests. This model can be used in all subjects and for all age levels of students (Una, 2023). This learning model emphasizes students to share knowledge and experiences with other groups.

The implementation of effective learning is carried out by applying cooperative learning. Cooperative learning is a series of learning activities carried out by students in certain groups to achieve the learning objectives that have been formulated. Therefore, one of them is the use of this TSTS learning model (Ermawati, 2018).

Isjoni (2009) as cited by Silalahi et al(2017) said that through inter-group visits, students are facilitated to develop activeness and communication skills. The effectiveness of the TS-TS type cooperative learning model is measured by student activeness. Learning is said to be effective if it reaches the desired target, both in terms of learning objectives and maximum student achievement. Learning is said to be effective if it has achieved the goals set through a learning process that emphasizes student activity. Learning is said to be effective if it reaches the desired target, both in terms of learning objectives and maximum

student achievement. Learning is said to be effective if it has achieved the goals set through a learning process that emphasizes student activity (Sinambela 2006 as cited by Silalahi et al 2017).

According to Lie (2002), TSTS is a technique that gives a student chance to share their ideas, arugumention and information to other group. In this technique there are some activities. Then by using this technique, thes student helps each other in teaching learning process. The high level and low level student will work together to achive the purpose of their group.

The concept is group work of two students visiting another group and two other students still in their group to receive two people from other groups, group work, returning to the original group, group work, group report (Istarani as cited by Zairmi, 2019). During the learning process using the TSTS model, participants are more active in following the learning process. Students recall the concepts that have been learned first and then provide information to other group members, so students can be better to understand the concept and easier to remember the lesson In this learning model student not only learn and receive what is present by the teacher but can also from other students. Students' responses to the TSTS learning model have a positive response and this shows that students are interested in the TSTS learning model in line and series topic (Huda et al, 2020).

Hak milik UIN Suska

Dilarang mengutip sebagian atau seluruh N ini tanpa mencantumkan dan menyebutkan sumber

According to Ikhsan et al (2020), by using the TSTS, students will get used to respecting other's opinions. They can express, it is expected that brave learners expressing their opinions, increasing students 'cohesiveness and confidence. This learning technique can be used for all subjects and all levels of learners. This learning technique also provides freedom for one group to cooperate with other groups. The combination of thoughts from other groups will help learners complete the group task given by the teacher. complete the group task given by the teacher. TSTS technique is very effective to use in the learning process because the learning interaction between learners continues as long as the group task has not been resolved. and this technique is commonly used in all subjects and for all ages of learners.

Based on the explanation of the TSTS learning model, it can be concluded that this cooperative learning model students are expected to express their opinions in group themselves, then in other group. TTSTS also gives the group the opportunity to share the results and information with other group. Through this type of TSTS students are divided into heterogeneous groups, each of 4 to 5 students. They discuss together to make a report. Then two students from each group will be show their report to another group. Two students who live in their group are in charge of dividing the work or responsible to convey information to the guests the Purpose of TSTS Learning Model (Handayani as cited by Prastika et al, 2018).

a. Advantages of TSTS Learning Model

According to Una (2023), advantages of the TSTS Model can be used in all subjects and all age levels of learners. Is one of the innovative models based on student activity. With the implementation of this learning model, students not only work with members of their group but can also work with other groups which allows for the creation of friendliness among friends in one class and students can switch roles as subjects in learning. Developing attitudes in students by increasing cohesiveness and selfconfidence. Improving the ability to speak express the opinions of students. The learning process in the classroom becomes more meaningful so that student learning outcomes also increase.

b. Disadvantages TSTS Learning Model

According to Una (2023), disadvantages of the TSTS Model it takes a long time. Students tend not to want to study in groups. For educators requires a lot of preparation (materials, funds and manpower). Tends to have difficulty in classroom management.

State Islamic University of Sultan c. Step of TSTS Learning Model

According to Huda (2013), the learning material using the TSTS learning model. With the following stage: (a). The teacher divides students into several groups of four people each, the groups formed are heterogeneous groups, for example one group consists of one high ability student, two medium ability students, one low ability student. The aim is to provide opportunities for students to teach and support each other. (b).

Hak Cipta Dilindungi Undang-Undan

Hak

milik UIN Suska

sebagian atau seluruh

The teacher gives materials to each group to discuss together with their group members. (c). Students work together with group members of four people, this aims to get students actively involved in the thinking process. (d). Once done, two people in each group leave their group to visit the other group. (e) The two people who stay in the group are responsible for sharing their work and information with the guests from the other group. (f). After the time is up, guests are invited back to their own groups to report their findings from the other groups. (g). Then the group discusses the results of their work. (h Each group presented their work.

B. Relevant research

A relevant study is a previous study that already exists or has been made which is considered quite relevant or related to the topic to be studied which is useful to avoid repeating research on the same topics. The author found several studies that could be used as material for consideration in this study.

Among the studies that have been carried out include:

1. Frissa Rizkihati Prastika, Dian Novita, and Rusly Hidayah (2018). Implementation Oof Cooperative Learning Type Two Stay Two Stray (TSTS)On Reaction Rate Matter to Train Student's Self Efficacy Grade X. Unesa Journal of Chemical Education. Vol. 7, No. 2, pp 180-186.

The aims of this research are to know implementation of cooperative learning model type TSTS on reaction rate matter, to describe student's self efficacy and to know student's reponses on reaction rate matter through the implementation of cooperative learning model type TSTS. This

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip sebagian atau seluruh

Tresearch data analyzed by One Group PretestPosttest Design. This research o was done for three meetings. Instruments that used in this research are implementation observation sheet, questionnaire and observation sheet of student's self efficacy and student's responses.

The data from the observation sheet of the implementation of TSTS cooperative learning model are used to know the implementation of TSTS cooperative learning model during the learning process. In the figure can be z seen that the implementation of cooperative learning model type Two Stay □ Two Stray obtained percentage of 100%; 93.75%; 97.92% with very good category. So, can be conclude that the learning is doing very well. Cooperative learning refers to learning strategies that students will work together in group that help each other in learning.

2. Nur Laila. (2021). The Implementation Of Two Stay Two Stray Technique On Students Speaking Skills At SMP Al Mursyidiyah. English Department, STKIP PGRI Bangkalan Indonesia.

Cooperative learning is a method of learning that involves students to work together in groups, obtain knowledge and enhance social skills. One of the alternatives techniques is using Two Stay Two Stray. This research is useful for teachers to provides information in the teaching and learning process by using Two Stay Two Stray technique. This research is also useful for students to add vocabullary becouse with this technique students can argue in class, so that will make students add vocabullary to convey their meaning. This study uses qualitative approach which observation and

Hak Cipta Dilindungi Undang-Undang

Dilarang mengutip

students' responses towards the utilization of two stay two stray technique in teaching speaking. For the results and discussions for this study show that two stay two stray technique helful the teacher to organize the teaching and learning process and also give many benefits for students in learning speaking can add their vocabullary. Students can complate assignments easily and fun in groups.

3. Maria evanrista Roslovenia Ndoi, Ida Bagus Made Astawa, Putu Indra Christiawan (2022). Efektivitas Strategi Pembelajaran Geografi pada Masa Pandemi Covid-19 di Kota Bontang. Jurnal Pendidikan Geografi Undiksha. Volume 10, Number 1, April 2022, pp. 43-53.

The research population is geography teachers in Bontang City totaling 16 people and 6 people are research samples by non probability sampling with purposive sampling technique and the student population totaling 525 students determining the sample by 'proportional random sampling' taking 10% of the number of students, namely 53 students. This research is descriptive research using descriptive qualitative data analysis techniques, qualitative data analysis technique. The results of the study are:

(1) learning strategies that apply are cooperative, expository, inquiry, and problem solving. The strategies used in learning are in accordance (79.17%) with the objectives, learning environment, school facilities and infrastructure, learning syntax. 20.83% of teachers stated that the strategies used were not suitable, especially the learning syntax, (2) the obstacles faced by geography

łak Cipta Dilindungi Undang-Undang

Dilarang mengutip

Iteachers (83.33%) during online learning came from students, namely networks, facilities, competence and evaluation. 7.54% of students do not have android-based smartphones so access is limited and do not have laptops for online learning (3) The effectiveness of online learning strategies implemented by geography teachers in Bontang City during the COVID 19 pandemic is classified as effective, namely 85.67%.

C. Operational concept

Operational concepts or operational variables are the operations of all variables that can be processed from conceptual definitions. here the variables to be studied are defined operationally which describes how to measure these variables, thus they are easy to define and easy to collect data, because they are operational and can be measured or observed (Azwir et al, 2015).

As for the variables that will be operationalized, the implementation of TSTS learning model according to Huda (2013) are:

1. The teacher divides students into several groups of four people each, the groups formed are heterogeneous groups, for example one group consists of one high ability student, two medium ability students, one low ability student. The aim is to provide opportunities for students to teach and support each other.

- 2. The teacher gives materials to each group to discuss together with their on group members.
- 3. Students work together with group members of four people, this aims to get students actively involved in the thinking process.

CHAPTER III

RESEARCH METHOD

A. Research Design

In this study using quantitative methods. According to Creswell (2014), quantitative research identifies research problems based on what happens in the field based on testing a theory consisting of variables, measured with numbers, and analyzed with statistical procedures to determine whether the predictive generalizations of the theory are valid. This study uses a descriptive quantitative design, in which provides a quantitative or numerical description of trends, attitudes or opinions of a population by studying a sample of that population (Creswell, 2013).

So it can be concluded that descriptive quantitative research is research that is numeric data collection and then explains the results in descriptive form.

B. Location and Times of the Research

This research was conducted on Juli-October 2023. The research will be conducted at SMPN 2 Tebing, Jalan Paya Cincin, Pamak, Karimun.

C. Subject and Object of the Research

The subject in this study is all English Language Education teachers at SMPN 2 Tebing. And the object of research is the implementation of two stay two stray learning in student learning activity in English lessons at SMPN 2 Tebing.

I

D. Population and Sample of the Research

C: p 1. Population

According to Creswell (2012, p. 142), "Population is a group of individuals who have the same characteristic". as for the population in this study were all English Education teachers at SMPN 2 tebing, totalling 4 people.

Sample

Suska²R

The sample is part of the number and characteristics of the population. When the population is large, it is impossible for researchers to study everything in the population. This is due to the limitations of the researcher himself in terms of time, funds and energy (Salam et al, 2015). For this reason, the researcher uses a sample taken from the population and must be a representative sample. In this study, the sampling technique that the authors used was purposive sampling technique, namely sampling with certain considerations. And the sample in this study was one English Education teacher at SMPN 2 Tebing.

E. Technique of Collecting Data

Observation

Observation is defined as systematic observation and recording of symptoms that appear on the object of research. Observation itself is divided into direct observation and indirect observation (Anggito et al, 2018). In this

Hak Cipta Dilindungi Undang-Undang Dilarang mengutip sebagian atau seluruh karya tulis

ak

Suska

Ra

study, researchers use a direct observation model, whereresearchers observe and record objects in the place where the event takes place.

Documentation

This method or technique is carried out by collecting data and analyzing a number of documents related to the research problem. the researcher must explain the document. The author used this technique to obtain student data, school history, school location and everything related to the school.

F. Technique of Data analysis

Data analysis is the process of arranging the order of data and organizing it into patterns, categories and basic descriptions (Ardianto, 2011). The data analysis process is carried out by reviewing the data collected by the teacher activity observation sheet. Data analysis of observation results was carried out using a Likert scale with the percentage as for the formula is (Sudjono, 2007):

Presentation =
$$\frac{\text{Acquisition Score}}{\text{Maximum Score}} \times 100\%$$

Then presented with the conclusions of the results of this study made in the form of sentences. The presentation is as follows (Ridwan, 2010):

Table III.1. Classification of Teacher's Score Likert Scale

NO	Categories	Achievments	
=1	High	76% - 100%	
2	Medium	51% - 75%	
3	Low	26% - 50%	
4 4	Very Low	0% - 25%	
2	<u> </u>

Hak An indicator of success is a criterion used to see the level of success of learning activities in improving learning in the classroom, to determine that the treatment used is effective and has an impact on changes in other variables, standards or benchmarks must be determined. Research with the Two Stay Two Stray model is said to be successful and can be stopped if it includes the specified indicators. The results of teacher activity observations are said to be successful if they reach an average score of 60% in the good category. (Kunandar, 2011).

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After the research was conducted, based on the results of data analysis, it can be concluded that teacher activities in the implementation of two stay two stray learning model were categorized as medium with a percentage of 73,95%. The success of a teacher activity can be said to be successful if the average reaches 60, 00%, so for the implementation of the two stay two stray learning model to improve student learning activeness in English lesson at SMPN 2 tebing this can be categorized as successful.

B. Suggestion

Based on the results of the study, the authors would like to submit suggestions as follows:

1. Teachers

Teachers should be able to apply the two stay two stray learning model better, so that it can make students who initially did not participate in the learning process become focused, and can even foster student activeness in these students.

2. Students

Students are expected to be able to cooperate with the teacher during the process of implementing the two stay two stray learning model. So that what is the purpose of learning can be well received, for example fostering activeness in students.

32

3. Another Researcher

The results of this research are expected to add experience and become input for other researchers and can also be used as research support for problems that are in accordance with the topic, as well as to foster insight both in the fields of writing and research.
