ACKNOWLEDGEMENT

In the name of Allah, the most Gracious and Merciful, praise belongs to Allah Almighty. With his guidance and blessing, the researcher has completed the final research paper entitled “An Analysis of Working Memory of the Tenth Grade Students in Reading Comprehension at Senior High School Taruna Mandiri. Then, the researcher says sholawat be upon to the Prophet Muhammad Shallallahu ‘alaihi Wasallam who has inspired and lightened many people worldwide.

Appreciation and sincere thanks to my beloved parents, **Mr. M.Yani** and **Mrs. Salmiani**, who has devoted all love and affection as well as moral and material attention. May Allah SWT always bestow grace, health, and blessings in the world and in the hereafter for the kindness that has been given to the researcher. Thank you so much Dad and Mom. May your days be long and blessed, and please stay healthy.

The researcher would like to show her gratitude to all the beloved people who have been encouraged and even helped the researcher finish the thesis. They are:

1. Prof. Dr. Hj. Leny Novianti MS, SE, M.Si, AK, CA., the Rector of the State Islamic University of Sultan Syarif Kasim Riau; Prof. Dr. H. Raihani, M.Ed, Ph.D., as Vice Rector; Dr. Alex Wendra, ST., M.Eng., as Vice Rector II; Dr. Harris Simaremare, ST., M.T., as Vice Rector III; and all staff. Thank you for the kindness and encouragement.
2. Prof. Dr. Amirah Diniaty, M. Pd. Kons., the Dean of the Faculty of Education and Teacher Training of the State Islamic University of Sultan Syarif Kasim Riau; Prof. Dr. Zubaidah Amir, MZ, M. Pd., as the Vice Dean II; and all staff. Thank you for the kindness and encouragement.

ABSTRACT

Gustiara Adisty, (2025) : An Analysis of Working Memory of the Tenth Grade students in Reading Comprehension at Senior High School Taruna Mandiri

This research aims to elucidate the underlying factors and dynamics of a specific phenomenon. By conducting a comprehensive analysis of relevant variables, the study seeks to enhance the researcher's capacity to draw informed and substantiated conclusions. The result showed that the students have an average to good working memory capacity, with 77% of them performing in the good category. It can be concluded that the working memory capacity of most tenth-grade students in this study is moderate, with a tendency toward the "Good" category. This level of working memory capacity is associated with relatively good performance in reading comprehension as well.

ABSTRAK

Gustiara Adisty, (2025) : An Analysis of Working Memory of the Tenth Grade students in Reading Comprehension at Senior High School Taruna Mandiri

Penelitian ini bertujuan untuk menjelaskan faktor-faktor yang mendasari dan dinamika fenomena tertentu. Dengan melakukan analisis komprehensif terhadap variabel-variabel yang relevan, penelitian ini berupaya untuk meningkatkan kapasitas peneliti untuk menarik kesimpulan yang terinformasi dan berdasar. Hasil penelitian menunjukkan bahwa siswa memiliki kapasitas memori kerja rata-rata hingga baik, dengan 77% di antaranya berprestasi dalam kategori baik. Dapat disimpulkan bahwa kapasitas memori kerja sebagian besar siswa kelas X dalam penelitian ini adalah sedang, dengan kecenderungan ke kategori "Baik". Tingkat kapasitas memori kerja ini dikaitkan dengan kinerja yang relatif baik dalam pemahaman bacaan juga.

ملخص

غوستيارا أديستي، (٢٠٢٥): تحليل الذاكرة العاملة لدى تلاميذ الصف العاشر في فهم المقروء بمدرسة تارونا منديري الثانوية

هذا البحث يهدف إلى شرح العوامل الأساسية وديناميكية ظاهرة معينة. ومن خلال إجراء تحليل شامل للمتغيرات ذات الصلة، يسعى هذا البحث إلى تعزيز قدرة الباحثة على استخلاص استنتاجات مبنية على معلومات دقيقة وأسس علمية واضحة. وأظهرت نتائج البحث أن التلاميذ يمتلكون قدرة متوسطة إلى جيدة في الذاكرة العاملة، حيث حقق 77% منهم نتائج ضمن الفئة الجيدة. ومن الممكن استنتاج أن قدرة الذاكرة العاملة لدى غالبية تلاميذ الصف العاشر في هذا البحث تقع ضمن المستوى المتوسط مع ميل إلى الفئة الجيدة. وترتبط هذه القدرة بمستوى أداء جيد نسبياً في مهارة فهم المقروء أيضاً.

CHAPTER I INTRODUCTION

A. Background of the Problem

Reading cannot be separated from daily activities. People read many kinds written materials such as newspapers, magazines, novels, academic books and so on. Through reading people can get a lot of information, knowledge, enjoyment and even problem solution. Therefore, the ability to read the text in any form will bring great advantages to the readers. All those purposes need reading skill enough.

According to Grabe and Stoller (2002) suggest that reading instruction can teach students to extract and analyse information from texts. Reading serves as a source of information and knowledge for pupils along their educational journey. Students who like reading and engage in reading activities are more likely to have strong writing abilities. Reading helps kids enhance their vocabulary and writing abilities. Students with low reading skills may struggle to study effectively.

Next, Klingner (2007) said that reading comprehension is a multi-component, highly complex process that involves many interactions between readers and what they bring to the text (previous knowledge, strategy use) as well as variables related to the text itself (interest in the text, understanding of text types).

SMA Taruna Mandiri Pekanbaru is one of the State Senior High Schools in Pekanbaru that applies 2013 Curriculum (K13). This school used it as a guidance in teaching and learning process including English subject. Based on curriculum 2013 there are three genres that students should learn, they are recount, descriptive, and report text. In reading, the tenth-grade students are expected to achieve standard competence which is to comprehend the purpose of social function, text structures, language features and the meaning of simple descriptive text contextually.

In formal situations, English subjects are studied twice a week with a duration of 45 minutes for one meeting. Based on the curriculum, the purpose of reading is that students are expected to be able to understand reading texts in the teaching and learning process.

On the other hand, to achieve the required curriculum goals, students must have the ability to interact in English both in formal and informal situations. Reading skill is one of the English skills taught and must be mastered by students at this school. In the syllabus, reading in English cannot be separated from the text as a source. Understanding the text is one focus of reading.

A number of students encounter challenges in acquiring English proficiency, particularly in the comprehension of descriptive text. These difficulties often manifest in the form of limited working memory capacity, difficulties in understanding reading material, and a lack of motivation to engage in reading activities. In contrast to the theoretical assertions that a

Hak Cipta Dilindungi Undang-Undang

1. Diarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

strong working memory directly correlates with superior reading comprehension, this study posits that the actual scenario may be more complex and nuanced.

Short-term memory, a fundamental psychological mechanism involved in language processing, plays a pivotal role in reading activities. This cognitive function serves as a temporary repository for information that is actively engaged in various cognitive tasks, including reading.

Based on preliminary study conducted at Senior High School Taruna Mandiri Pekanbaru, the researcher discovered the following phenomena, some students are uninterested in reading the text, struggle to tell what they have read in their own terms, struggle with reading comprehension, experience difficulties during the learning process and answered the reading questions incorrectly. It can be concluded that students' mental abilities in processing information, thinking, learning, and understanding are still lacking, such as reading and understanding texts.

Memory refers to the process of storing or maintaining information that individuals have acquired throughout their lives. Almost all human activities, whether cognitive, affective, or psychomotor, definitely involve memory. Therefore, memory is very important in various processes experienced by humans.

From the previous research by Yanjie Li and Cindy Brantmeier (2021) more than 30 years of research in L1 reading since Daneman and Carpenter's (1980) seminal work on working memory and reading has

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

- a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.

demonstrated that working memory is an important predictor of reading performance. Readers' comprehension outcomes are operationalized with their performance on comprehension tasks such as multiple-choice, summary test, cloze test, etc. Each type of assessment tasks only measures some aspects of the reader's comprehension.

Therefore, the effect of working memory capacity on L2 reading comprehension is hypothesized to differ when different types of comprehension tasks are used. The correlation analyses showed that the contribution of working memory capacity to reading comprehension varied depending on the type of comprehension measures used and that readers with a larger working memory capacity employed a greater variety of reading strategies than those with a smaller working memory capacity. Working memory has been the focus of much interest to researchers as it is invaluable in predicting higher order cognition such as academic achievement and sentence comprehension (Magimairaj & Montgomery, 2012), in fact it has been stated that, "Working memory is one of the most heuristic and important concepts of cognitive psychology" (Barrouillet, 2007).

Because of the reasons above the researcher is interested in conducting the research about An Analysis of Working Memory Capacity on Reading Comprehension of Senior High School Taruna Mandiri Pekanbaru.

Hak Cipta Dilindungi Undang-Undang

1. Diarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

2. Diarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

B. Identification of the Problem

Analysis of working memory capacity on reading comprehension at the senior high school level can involve identifying specific problems or challenges that students have in this context. Some students have lower level of holding and manipulating information while reading because they have struggled to integrate and connect ideas from the text. Some students have difficulty processing complex sentences that lead to an understanding of the overall meaning, struggling to stay focused especially when faced with long or challenging texts that lead to reduced comprehension.

C. Limitation of the problem

After describing the problem identification above, it is necessary to formulate this research problem. This study focused on students' working memory on reading comprehension of descriptive texts at Senior High School Taruna Mandiri.

D. Formulation of the problem

Based on the limitation of the problems stated above, the researcher formulates the problem about how is the working memory on students' reading comprehension in descriptive text of the tenth-grade students at Taruna Mandiri?

E. Objectives of the Research

The purpose of holding this research is to answer the question in the problem formulation. The objective of the research is to find out how is the

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

working memory on students' reading comprehension in descriptive text of the tenth-grade students' at Taruna Mandiri.

F. Significance of the Research

This research has theoretical and practical significance. Theoretically, this study aims to investigate possible effect of students working memory on reading comprehension. According to University of Michigan research, improving working memory can boost scores in general problem-solving ability and improve fluid intelligence. Fluid intelligence is defined as the ability to solve new problems, use logic in new situations, and identify patterns. In contrast, crystallized intelligence is the ability to use learned knowledge and experience.

Practically, this study aims to help students reach their full potential and become fluent readers on reading comprehension. When students with weak working memory on reading, they may forget what was at the beginning of the paragraph by the time they get to the end. As a result, these students will look like they have difficulty with reading comprehension. They do, but the comprehension problem is due to a failure of the memory system rather than the language system. So, we can conclude that working memory is linked to reading comprehension.

Hopefully, this research is expected to be very meaningful, especially for the researcher as a novice researcher in terms of learning to conduct research. Valuable inputs for both students and teacher of English of tenth-grade students at Senior High School Taruna Mandiri as a

consideration for the following teaching points and contributory to increasing working memory in reading class.

G. Definition of the Term

1. Working Memory

According to Baddeley (2012) working memory is an evolution of the initial concept of short-term memory. If short-term memory refers only to temporary information storage space, then working memory combines temporary storage space with manipulating that information.

2. Reading Comprehension

According to Grabe (2002) reading comprehension is the ability to understand information in a text and interpret it appropriately. Reading without comprehension is nonsense and useless. They are relating to each other and cannot be separate. Comprehend have the same meaning with understanding. It means reading comprehension is the essence of the reading process from what is being read and to find out the meaning from the text.

3. Descriptive Text

Jackson (2011) have state that “descriptive text is use to explain what something is like, to give its dimensions, its layout, its characteristic features, its uses, and so on”. However, in this research descriptive text is referring to a text which is learned by the students of SMA Taruna Mandiri Pekanbaru.

CHAPTER II

LITERATURE REVIEW

A. Theoretical Framework

1. Reading Comprehension

a. Definition of Reading Comprehension

Reading comprehension is a process of reading in order to build understanding (Tarichi, 2017). According to Spear-Swerling in Fitria (2019) reading comprehension is a type of reading that aims to understand the reading itself. Meanwhile, Achmad (2010) states that reading comprehension is a reading strategy that aims to provide an assessment of papers that involve themselves in a reading and make an appropriate analysis of the reading.

Reading comprehension is constructing meaning from text. According to McNamara (2007) reading comprehension is a product of complex interactions between the properties of the text and what readers bring to the reading situation. According to Klingner (2007), reading comprehension is a multi-component, highly complex process that involves many interactions between readers and what they bring to the text (previous knowledge, strategy use) as well as variables related to the text itself (interest in the text, understanding of text types).

Based on the explanation above, the researcher concluded that reading comprehension is the power to get an idea or meaning from

written text, understanding it by processing the experience and prior knowledge. Also, while reading, the reader not only absorbs new information but the reader also needs to combine it with prior knowledge. If the reader does not have the background knowledge and poor vocabulary, they will have difficulties in comprehending the text.

At this level, the reader is able to infer information beyond what is written on the page, such as the main character's emotion from his actions and words. The reader must be able to use information effectively to determine cause and effect and to predict what might happen next in order to function at the inferential level.

At a more difficult level, the reader is able to evaluate what he or she is reading, for example, spotting the author's effective writing style, spotting when some statements in the text are inaccurate or biased, appreciating the writer's point of view, comparing and contrasting the information with other facts they have read elsewhere, and considering the significance of the opinions presented, if any. The majority of weak readers' cognitive work is consumed by deciphering the print; therefore, they have a great deal of difficulty moving beyond a literal level of comprehension.

Based on several definitions above, the researcher concludes that reading comprehension is an ability of the readers to read a text, understanding the meaning, utilizing of information gained through symbol of the text that involves any level concentration.

 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

b. The Components of Reading Comprehension

According to I.S.P Nation (2009) reading comprehension skill has five components contained in reading text that may help the students in understanding a text. There are finding main idea, finding factual information, Finding the meaning of vocabulary, identifying reference and Making inference. It can be illustrated as follows:

1) Finding factual.

Factual information requires readers to scan specific details. There are many types of question of factual information such as question types of reason, purpose, result, comparison, mean, identify, time, and amount in which most of the answer can be found in the text.

2) Main idea.

Reading concerns meaning to greater extent than it with form. An efficient reader understands not only the ideas but also their relative significance, as express by the author. In other words, some of the ideas are super ordinate while another subordinate.

3) References.

In English, as in other language, it would be clumsy and boring to have repeated some word or phrase every time a reader used it. Instead of repeating the same word or phrase

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

several times it has been used. We usually refer to it rather than repeated it. For this purpose, we use reference words most often, reference expression will refer to a preceding word or phrase. Reference words are usually short and are very frequently pronouns, such as it, she, he, this, those and so on.

4) Inference.

Students are expected to make accurate predictions. The prediction can make by correctly interpreting the indication a writer's gives. Reading comprehension also can be differed by its purpose. Based on the experts' explanation above, the researcher concludes the reading comprehension is one's ability in comprehending the message of the English reading materials. It is an interactive and thinking process of transferring printed letters into meaning in order to communicate certain message between the writer and the reader. It involves the process, identifying the text element such as, finding main idea, details, and the meaning vocabulary in context, identifying reference, and making inferences.

5) Vocabulary.

Vocabulary is a set of lexes such as single word, compound words and idioms. vocabulary as words in a language; the

total number of vocabularies is a list of words with their meanings.

c. The Implementation of Curriculum 2013 for Teaching Reading

Regarding the curriculum implementation, In Indonesian context, different curriculums are implemented periodically; different stakeholder in different government era may produce a different curriculum in the curriculum are because of the changes of needs: political and academic needs. The needs of students/learners and stakeholders are a different year by year.

Therefore, some changes need to be made to fulfill the students need. As stated in the Government Regulation of Ministry of Education and Culture in number of 58, the year of 2014, the aim of the 2013 Curriculum is to prepare the Indonesian in order to have the ability to live as individual and citizen that is faithful, productive, innovative, effective, and able to contribute to the social life, nation, country, and the world civilization. This curriculum is the next step of developing of curriculum based on competencies. The competencies, furthermore, is designed integrally with the attitude, knowledge, and skills. (Kemendikbud, 2014)

The 2013 curriculum is a curriculum of value which is occupied by character building. According to Mulyasa (2013), the

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

implementation of the 2013 curriculum is independent that learner can increase and use their knowledge, assess the value of character good morality in order they will exhibit positive attitudes in their daily behavior.

The values are mentioned in Core Competences (Kompetensi Inti/ KI). These competencies contain four competencies (KI 1 to KI 4). KI 1 refers to spiritual aspects, KI 2 is for social aspects (behavior), KI 3 is designed for knowledge aspects, and KI 4 is for skills aspects. Basic Competences which are abbreviated with KD is the references to develop the competencies in indicators. In the 2013 curriculum, the teaching learning activities are based on scientific approach.

The approach covers five steps, i.e. observing, questioning, gaining information, associating, and communicating. The teaching method, therefore, collaborates with the inquiry-based learning, project-based learning, discovery learning, problem-based learning and task-based learning.

d. Reading Comprehension Difficulties and Factors Influencing the Difficulties

Reading comprehension problems have been a popular issue in EFL teaching and learning for a long time. A number of studies show that most EFL students often experience difficulties in understanding English texts. Kasim (2017) conducted research

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

to determine students' difficulties in reading comprehension. They found that EFL students in Banda Aceh had several reading comprehension problems, namely the meaning of new vocabulary, word complexity, passive voice, word order and tenses in linguistics. The main factor for their problems in understanding English texts is foreign vocabulary.

In addition, Westwood (2008) discussed that reading comprehension difficulties can be caused by a variety of different factors, including individual intrinsic factors and other factors related to inadequate instruction or inappropriate material. Westwood pointed out that there are eight causes of reading comprehension difficulties, they are limited vocabulary knowledge, lack of fluency, lack of subject matter familiarity, inadequate use of reading strategies, legibility, weak verbal reasoning, problems processing information, and problems remembering after reading.

Just as the relationship between remembering and learning exists, there is also a relationship between remembering and understanding. If we understand something, we are often able to remember it better. Once we understand, we may be able to know where to store the information in long-term memory, and then lead to effective retrieval. Furthermore, if we are able to retrieve previously learned information from long-term memory when we

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

are presented with new to-be-learned information, we can associate between the two and, therefore understand the new information better. In this way, memory facilitates understanding (Thorne, 2003).

2. Working Memory (WM)

a. Definition of Working Memory (WM)

Researcher have view what are formerly known as short term memory as working memory (Baddeley A. , 1986). The change in terminology results from the notion that this specific component of cognitive and linguistic processing is responsible not only for the storing of information but also for processing language input and output and integrating text components with one another and with previously acquired knowledge (Siegel, 1989). Keeping an item in short-term memory for a certain amount of time lets you eventually transfer it to long-term memory for more permanent storage. This process is facilitated by the mental work of repeating the information, which is why the expression “working memory” is increasingly used as a synonym for short-term memory.

According to Goldstein (2011) working memory is one component or part of short-term memory. This process is facilitated by the mental work of repeating the information, which is why the expression “working memory” is increasingly used as

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

- a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
- b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

a synonym for short-term memory. Working memory is a cognitive system responsible for temporarily holding and manipulating information in the mind. It plays a crucial role in learning and academic performance, making it an important concept to understand for students.

Next, Baddeley (2012) stated working memory is an evolution of the initial concept of short-term memory. If short-term memory refers only to temporary information storage space, then working memory combines temporary storage space with manipulating that information. There seems to be much confusion about which components of working memory have the most significant influence on reading comprehension.

Furthermore, Baddeley (Fisher, 2008) suggests that research should be directed at identifying the key executive processes of working memory, and the individual role played by the phonological loop, in working memory performance. How the phonological loop is involved specifically with adjectives during reading or language tasks? Adjectives are words that describe nouns (e.g., red, tall, heavy, beautiful). When you read or hear adjectives, your brain uses the phonological loop to temporarily hold and process their sounds and meanings.

It may be useful to measure and assess each aspect of working memory individually, in order to fully understand the

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:

 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

nature of working memory and determine where it is deficient (Fisher, 2008).

In memory, of course, each storage space has a different capacity, such as working memory. Working memory capacity is a system that has a limited capacity to store and manipulate temporary information. Working memory capacity has an important role in the development of cognition and the learning process of children in the academic field Andrews (2011) Individuals will have a high working memory capacity if the ability in the learning process such as counting, remembering, reading, concentrating and so on is also high (Autin, 2012).

b. Working Memory and Reading Comprehension

Westwood (2013), states that working memory is the main feature involved in reading comprehension and in understanding and communicating through spoken language. Intuitively, one can understand why working memory is so important for reading comprehension performance: To build a coherent representation of a text while reading it, it is necessary to store online in temporary memory a mental model of the situation outlined in the text, as well as dynamically revise it when new information becomes available, especially if the new information does not match previous information.

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

The relationship between working memory and reading comprehension may occur because an important component of comprehension skills is the ability to process semantic and syntactic relationships between consecutive words, phrases and sentences, to develop a coherent representation of the entire text (Oakhill. J, 2011). In all current models of reading comprehension, integration and inference processes are important in the structure of a coherent text model, both locally and globally.

Working memory acts as a buffer for the most recently read propositions in a text, so that it can be combined with the current model of the text, and also holds information accessed from long-term memory to facilitate its integration with the currently active text. Therefore, children with poor working memory capacity should be less capable of this type of processing than children with greater working memory capacity (Oakhill. J, 2011).

3. Descriptive Text

a. Definition of Descriptive Text

According to Anderson (2003), descriptive text describes particular person, place, or things. It means that descriptive text is designed specially about a person, a place, or things. They also stated descriptive text to talk about subject by describing its feature without including personal opinions.

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

Moreover, Barbara (2004) added that description gives a significant point of view because it transforms our feeling and extends our experiences. It means that description is telling about something or someone particularly which bring the reader's perception change and spread the reader's knowledge widely.

b. The Elements of Descriptive Text

The descriptive text contains some elements. According to Apriliansyah (2016) descriptive text contains three elements. They are:

- 1) Social Function. The social function of descriptive text is to describe certain people, places, or objects.
- 2) Generic Structure
 - a) Identification. It is use to identify the phenomenon that will be explain.
 - b) Feature Description. It is use to describe features in the order of importance such as parts/objects (physical appearance), quality (level of beauty, excellent, or value), and other characteristics (unique prominent aspects).
- 3) Language Features.
 - a) Focusing on particular nouns, for examples:
uncle, hospital, my rabbits, etc.

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

- b) Using adjective types, for examples: confusing stories, unique bottles, simple women, etc.
- c) Using a relational process, for examples: we have two cats; his niece is very smart; I water the flowers; etc.
- d) Using figurative language, for examples: Rita's smile is as sweet as sugar; this ice cream is as cold as snow; our face is as light as the moon; etc.
- e) Using conjunctions, for examples: my house is big, so there are many rooms in it; we buy some fruit, and we give them to the orphans, our house yard is very clean, for we sweep it every morning; etc.

The Example of Descriptive Text

Identification:

I have a toy. It is a doll, a bear doll, and I call it Teddy. Teddy bear is an American origin. My dad bought it as a present for my tenth birthday anniversary last year.

Description:

The doll is small, fluffy, and cute. It has thick brown fur. When I cuddle it, the fur feels soft. Because my Teddy bear is a doll, I don't need to feed it. I wash it at laundry at least once a month.

 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

Every night Teddy accompanies me sleeping. When I am at school, Teddy stays in my bed. Teddy bear is really nice, adorable, and charming toy. I love my Teddy bear very much.

Resource from Wardani, Basri, & Waris (2014)

c. Assessment of Reading Comprehension in Descriptive Text

Fink (1983) said that the purpose of description is to imagine the reader by using a picture of a person, subject, or setting. It is allowed by using picture, so that the reader can visualize it.

According to Febriani (2011) the purpose of the descriptive text is to get the reader imagine within the story to get pleasure and information. Generally, the purpose of descriptive text is to describe something, someone, a place, animal, or plants specifically.

Furthermore, Stanley M. and King (1999) in Ningsih (2015) states that there are five components of reading comprehension which are appropriate with Islamic Senior High School curriculum, they are:

- 1) Finding main ideas. It is the main topic can be discussing in a paragraph in which help the readers to guess what paragraph is about. Main idea can be able to find in the first, middle, or the last sentence of the paragraph.

Hak Cipta Dilindungi Undang-Undang

 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

- 2) Finding factual information. It requires the readers to scan specific details of the text. It usually appears with guessing question word. Finding factual information can be able to find detail information such as person, place, event and time.
- 3) Finding the meaning of vocabulary in the context. The reader should be able to guess the meaning of unfamiliar word in the paragraph or sentence which they have read.
- 4) Identifying reference. The same words or phrases find in several times in the paragraph. They are usually short and very frequently pronouns, such as they, she, he, it, her, him, and others. This component can be able to identify the word which they refer to help the reader understand the reading passage.
- 5) Making inference. The readers are expecting to make accurate prediction. The prediction can make by correctly interpreting the indicators a writer's gives.

B. Relevant Research

1. Research by Yanjie Li and Cindy Brantmeier (2021) entitled "The Effects of Working Memory Capacity on Reading Comprehension and Strategy Use with Chinese EFL University Students" The research showed that the contribution of WMC to reading comprehension varied depending on the type of comprehension

Hak Cipta Dilindungi Undang-Undang

- b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

measures used and that readers with a larger WMC employed a greater variety of reading strategies than those with a smaller WMC. In addition, correlation analyses and independent sample t-tests revealed that, compared to readers with a smaller WMC who favoured decoding strategies, readers with a larger WMC tended to use more top-down strategies that facilitated the global comprehension of the text. Implications and suggestions for future research are also provided.

2. Research by Dr. Hossein Siahpoosh and Mona Fanaee (2022) entitled “The Impacts of Working Memory on Reading Comprehension of Iranian EFL Learners”. Correlation analysis showed that the contribution of the WMC to reading comprehension varied with the type of reading comprehension scale, and that readers with high WMC used a variety of reading strategies than readers with low WMC. In addition, correlation analysis and independent sample t-tests showed that readers with high WMC tended to use top-down strategies that contributed more to global understanding of texts compared to readers with low WMC who favored decoding strategies.
3. Research by Davi Alves Oliveira (2016) entitled “Working Memory Capacity and Mental Translation in EFL Reading Comprehension”. The research showed a weak but statistically significant correlation between working memory capacity and recall scores in the second

Hak Cipta Dilindungi Undang-Undang

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

condition and no correlations between working memory capacity and reading time.

4. Research by Masyitoh (2020) entitled “The Correlation between Student’s Working Memory and Their Reading Comprehension in Recount Text of Tenth Grade at Islamic Senior High School Teknologi Riau Pekanbaru”. The research showed that students’ working memory was categorized into middle level and students’ reading comprehension was categorized into less level. It can be concluded that there is significant correlation between students’ working memory and their reading comprehension at Islamic Senior High School Teknologi Riau.
5. Research by Amber Jean Sadler (2014) entitled “Working Memory and Reading Comprehension Abilities in Grade 4 Boys”. The research showed a positive linear relationship between reading comprehension and working memory in grade 4 boys as reading comprehension increase so does working memory.

In conclusion, this research has similarities and differences with previous research. The similarities are the theory that the researcher use is working memory, also the text that will use is descriptive text. The differences are the curriculum implemented in the research school is Curriculum 2013, meanwhile in the previous research the curriculum implemented is related to their school or university.

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

C. Operational Concept

Operational concept was used to give limitation to the theoretical framework due to avoid misunderstanding and misinterpreting for the readers in this research. Operational concept also continues to operate abstractly from research planning, that is defined in certain words so that is easy to measure. As claimed by Syafi'i (2018), operational concepts are derived from connected theoretical concepts on all the variables that should be used in a research paper in a practical and empirical operated in an academic writing.

The theoretical framework for this research was Baddeley and Hitch's influential model of working memory which was first formulated in 1974 and subsequently refined by Baddeley in 2000. This model provides a theoretical framework with which to describe the relationship between the working memory system and reading comprehension.

According to Lefrançois (2012) Baddeley's model of working memory attempts to clarify the process involved in paying attention, in learning, and in remembering. The Baddeley and Hitch model suggests that because working memory is flexible, should the phonological loop.

1. Comparing adjectives
2. Remembering a list of adjectives

This model of working memory has been validated by evidence from studies of children by Alloway, Gathercole, & Pickering (Alloway, 2007) and 2neuroimaging investigations by Valler & Papagno (Alloway, 2007) and has survived more than 30 years of academic scrutiny (Pickering, 2006).

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

CHAPTER III

RESEARCH METHOD

A. Research Design

This research was a descriptive research design. This research was quantitative research with is used to analysis design. According to Creswell (2012), this descriptive question to identify participants' responses to a single variable or question. This single variable may be independent, a dependent, or an intervening variable. Cresswel (2012), also stated that survey research design is a procedure in quantitative research because a researcher collects the data by using questionnaire which investigators survey to a sample to describe the attitude, opinion, behavior, or characteristic of population.

This research aims to elucidate the underlying factors and dynamics of a specific phenomenon. By conducting a comprehensive analysis of relevant variables, the study seeks to enhance the researcher's capacity to draw informed and substantiated conclusions. The findings were presented in a clear and concise written format, incorporating the quantitative results derived from the calculation of research indicators.

B. Time and Location of the Research

The time of the research was conducted on October to December 2024. The location of the research was conducted at the tenth-grade students of the Taruna Mandiri.

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

C. Subject and Object of the Research

The subject of the research is the tenth-grade students of the Taruna Mandiri. The object of the research is an analysis of Working Memory Capacity at Tenth Grade Students on Reading Comprehension of Senior High School Taruna Mandiri.

D. Population and Sample of the Research

The population of this research are the tenth-grade students of the Senior high school Taruna Mandiri. Cresswell (2012) note that the population is the group of individuals that have one characteristic that distinguishes them from other groups. There are 10 classes of the tenth-grade students of the Senior high school Taruna Mandiri. The total population of the first-year students have 300 students.

Table III.1
The Total Population of the Tenth Grade of Senior High School Taruna Mandiri

No	Classes	Total
1	X A	30
2	X B	30
3	X C	30
4	X D	30
5	X E	30

Total		300

Based on the total population, the population are more than 100 students. So, the researcher used simple random sampling in taking the

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

sample. Simple random sampling is the process of selecting a sample in such a way that all individuals in the defined population have an equal and independent chance of selection for the sample (Nuardi, 2013). It means that by using simple random sampling we can choose individuals as the sample to represent the population. Arikunto (2006) suggested that simple random sampling is if the population is more than 100 persons, the sample can be taken between 10-15%, 20-25% or more. In this research, there are 300 students as the population and the researcher took 10% of the population, so the total samples are 30 students, the researcher took the sample by using lottery.

Table III.2
The Total Sample

No	Classes	Total	10%

10	X J	30	3
Total		300	30

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

E. Technique of Collecting the Data

The data collection methods used in the study are test, questionnaire and documentation. Here is an explanation of the methods:

1. Test

To collecting the data, the researcher used test. According to Brown (2003), test means a method measuring of a person's ability, knowledge or performance. To collect the data from the sample, the researcher is using multiple-choice items from which they have to choose one correct answer among four options. This assessment will evaluate students' working memory capacity through reading comprehension, specifically as applied to descriptive text. The assessment comprises twenty-five items. Each correct response is awarded four points. Upon completion of the assessment, the researcher tabulated the total score obtained by each student.

Table III.3
The Classification of Students' Working Memory

Score	Category
90-100	Excellent
70-89	Good
50-69	Average
≤ 50	Below Average

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

2. Validity

The test used for testing students' working memory difficulties on reading comprehension had to have validity. In according to Bachman (2004) explains that validity is an integrated evaluative judgment of the degree to which empirical evidence and theoretical rationales support the adequacy and appropriateness of inferences and action based on test scores or other modes of assessment.

In according Brown (2003) said that the expert should look into whether the test content is representative of the skills that are supposed to be measured. This involves looking into the consistency between the syllabus content, the test objective, and the test contents. If the test contents cover the test objectives, which in turn are representatives of the syllabus, it could be said that the test possesses content validity. Hughes (2005) also state that a test is said to have content validity if its content constitutes a representative sample of the language skills, structures, etc which it is meant to be concerned.

To find out the accuracy of a measuring instrument in measuring data, it was necessary to test the measuring instrument, whether it was valid or not. In this research, researcher used 30 students to test the validity. The value of r_{observed} must be compared with r_{table} . Degree of freedom $30-2=28$, $r_{\text{table}=28}$ are 0,36.

If the value of $r_{\text{observed}} > r_{\text{table}}$ = valid

 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

If the total value of $r_{\text{observed}} < r_{\text{table}} = \text{invalid}$

Item	r_{observed}	r_{table} (df=28,5%)	Result
Item 1	0,43	0,36	Valid
Item 2	0,41	0,36	Valid
Item 3	0,45	0,36	Valid
Item 4	0,50	0,36	Valid
Item 5	0,39	0,36	Valid
Item 6	0,39	0,36	Valid
Item 7	0,37	0,36	Valid
Item 8	0,44	0,36	Valid
Item 9	0,42	0,36	Valid
Item 10	0,42	0,36	Valid
Item 11	0,40	0,36	Valid
Item 12	0,45	0,36	Valid
Item 13	0,37	0,36	Valid
Item 14	0,44	0,36	Valid
Item 15	0,45	0,36	Valid
Item 16	0,56	0,36	Valid
Item 17	0,63	0,36	Valid
Item 18	0,55	0,36	Valid
Item 19	0,45	0,36	Valid
Item 20	0,42	0,36	Valid
Item 21	0,39	0,36	Valid
Item 22	0,51	0,36	Valid
Item 23	0,40	0,36	Valid
Item 24	0,52	0,36	Valid
Item 25	0,42	0,36	Valid

The data above was consulted with r_{table} at a significance level of 5%. Usually, researchers use a significance level of 5% or 1% because it is more suitable for educational research, but in this research the researchers used a significance level of 5% because most researchers previously used 5% and in SPSS the significance is written by default as 0.05 (5%). In this research there were 30 students, meaning $N = 30$. According to Harrington (2009), $df = N - 2 = 30 - 2 = 28$. Researchers took df 28, so in this research there were 25 vocabulary mastery in under comprehending descriptive text test items is used in this research.

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

3. Reliability

Bachman (2004) states that reliability is the consistency of measures across different conditions in the measurement procedures. Test administration must be consistent by which a test can be said as a well-organized test. In vice versa, bad administration and unplanned arrangements of a test can make it does not work in measuring students' accomplishment. It is clear that reliability is used to measure the quality of the test scores and the consistency of the test.

To make it easier, the researcher uses SPSS. The reliability of a psychometric instrument refers to the extent to which scores on the instrument are free from errors of measurement. The characteristic of reliability was sometimes termed consistency (Brown, 2003). The following table is the level of internal consistency of Cronbach alpha by (Cohen, 2007).

Table III.4
Level of Internal Consistency of Cronbach Alpha

No	Reliability	Category
1	≥ 0.90	Very highly reliable
2	0.80 – 0.90	Highly reliable
3	0.70 – 0.79	Reliable
4	0.60 – 0.69	Minimally reliable
5	≤ 0.60	Unacceptably low reliable

Hak Cipta Dilindungi Undang-Undang

1. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber:
 - a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penyusunan laporan, penulisan kritik atau tinjauan suatu masalah.
 - b. Pengutipan tidak merugikan kepentingan yang wajar UIN Suska Riau.
2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

In this research, the researcher used SPSS to calculate the reliability of the test. The result of the reliability for the test is as follow:

Reliability Statistics		
Cronbach's Alpha	Cronbach's Alpha Based on Standardized Items	N of Items
.837	.839	25

The table showed that the reliability of the test was 0.837 which is categorized into the highly reliable level.

F. Technique of Data Analysis

Regarding data with descriptive statistics, researcher need to first pay attention to the type of data. If the researcher has discrete data, the presentation of the data that can be done is to look for absolute frequencies, relative frequencies (looking for percentages), and look for measures of central tendency, namely: mode, median and mean (Arikunto, 2013).

$$P = \frac{F}{N} \times 100\%$$

Where:

P = Percentage

F = Frequency

N = Respondent

As a result of data collection, a number of data is obtained that was provide answers to research problems. In data processing, several steps are carried out in data processing activities related to tabulation, calculating and interpreting data. Meanwhile, to simplify data processing, the SPSS computer program was used. Descriptive analysis is used to know the measurement of central tendency of the mean score of the students' reading

2. Dilarang mengumumkan dan memperbanyak sebagian atau seluruh karya tulis ini dalam bentuk apapun tanpa izin UIN Suska Riau.

comprehension. According to Gray et al, (2007) measurement central tendency provides to describe the average and typical respondent. Singh (2006) state mean score can be calculated by using a following formula:

$$M = \frac{\sum x}{N}$$

M =Mean of students' score

$\sum x$ =The sum of the students' score

N =Total number of all students

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the explanation at chapter IV, the researcher concludes that the answer of the formulation of the problem. The majority of students have an average to good working memory on reading comprehension with 77% of performing in a good category. The mean score was calculated to be 78%, this suggests on average, the students' working memory falls within good category.

This study shows that cognitive processes, in terms of working memory, can be improved and developed through conscious effort in the way we teach and in the way we enable students to practice these skills in the classroom. Poor working memory appears to place a child at high risk for poor scholastic achievement.

B. Suggestion

This study suggests that effective comprehension can be achieved if remediation and intervention programs use management strategies that ease the burden placed on working memory. This can lead to success in school and work outside of school, as well as in their personal lives. Those who can read and have high literacy memory will have better career choices, be able to access higher education and generally lead more meaningful lives. Of course, this will help the transition in the tenth grade, from learning to read,

to reading to learn. There are several suggestions that the researcher would like to convey to the readers, there are:

1. For teachers, especially English teachers, the teacher could use working memory theory as an alternative approach to improvement students' reading comprehension. It can be useful to improve their English teaching and learning. The learning material should be related to the context of the students live in order to make the students easier to relate new information and their background knowledge.
2. For the students, the students are hoped to enrich their vocabulary in order to comprehend the text easier. They are expected to pay attention in teaching process and try to respond the teachers' question. And they are expected to identify and find the main idea and important information in descriptive text.
3. For future researchers, it is hoped that this research can become an additional reference in further research. Furthermore, it is hoped that this research can be developed and used with other abilities in English.

RENCANA PELAKSANAAN PEMBELAJARAN

Sekolah : SMA Taruna Pekanbaru Kelas : X/I(Ganjil)
Mata pelajaran : Bahasa Inggris Alokasi Waktu : 1 JP
Materi pokok : Teks deskriptif Jenjang : X

PERTEMUAN I

A. TUJUAN PEMBELAJARAN

Setelah mengikuti proses pembelajaran, peserta didik diharapkan dapat menganalisis unsur kebahasaan dari teks eksposisi analitis

Media/Alat, Bahan dan Sumber Belajar

Media : Worksheet atau lembar kerja (siswa), Lembar penilaian

Alat/Bahan : Spidol, papan tulis, Laptop & infokus.

Sumber Belajar : Buku dan internet.

B. KEGIATAN PEMBELAJARAN

Pendahuluan	
1. Melakukan pembukaan dengan salam pembuka dan berdoa untuk memulai pembelajaran, memeriksa kehadiran peserta didik sebagai sikap disiplin.	
2. Mengaitkan materi/tema/kegiatan pembelajaran yang akan dilakukan dengan pengalaman peserta didik dengan materi/tema/kegiatan sebelumnya serta mengajukan pertanyaan untuk mengingat dan menghubungkan dengan materi selanjutnya.	
3. Menyampaikan motivasi tentang apa yang dapat diperoleh (tujuan & manfaat) dengan mempelajari materi: <i>Unsur-Unsur Kebahasaan Dari Teks Eksposisi Analitis</i> .	
4. Menjelaskan hal-hal yang akan dipelajari, kompetensi yang akan dicapai, serta metode belajar yang akan ditempuh,	
Kegiatan Inti	KEGIATAN LITERASI
	Peserta didik diberi motivasi dan panduan untuk melihat, mengamati, membaca dan menuliskannya kembali. Mereka diberi tayangan dan bahan bacaan terkait <i>Unsur-Unsur Kebahasaan Dari Teks Deskriptif</i> .
	CRITICAL THINKING
	Guru mengarahkan pemikiran siswa dengan mengajukan pertanyaan-pertanyaan. Pertanyaan ini harus tetap berkaitan dengan materi <i>Unsur-Unsur Kebahasaan Dari Teks Deskriptif</i> .
	COLLABORATION
	Peserta didik dibentuk dalam beberapa kelompok untuk mendiskusikan, mengumpulkan informasi, mempresentasikan ulang, dan saling bertukar informasi mengenai <i>Unsur-Unsur Kebahasaan Dari Teks Deskriptif</i> .
	COMMUNICATION
	Peserta didik mempresentasikan hasil kerja kelompok atau individu secara klasikal, mengemukakan pendapat atas presentasi yang dilakukan kemudian ditanggapi kembali oleh kelompok atau individu yang mempresentasikan
	CREATIVITY
	Guru dan peserta didik membuat kesimpulan tentang hal-hal yang telah dipelajari terkait <i>Unsur-Unsur Kebahasaan Dari Teks Deskriptif</i> . Peserta didik kemudian diberi kesempatan untuk menanyakan kembali hal-hal yang belum dipahami.
Penutup	
1. Peserta didik membuat rangkuman/simpulan pelajaran tentang point-point penting yang muncul dalam kegiatan pembelajaran yang baru dilakukan.	
1. Melakukan refleksi tentang proses dan hasil belajar peserta didik.	

C. PENILAIAN HASIL PEMBELAJARAN

1. **Penilaian Pengetahuan:** berupa tes tertulis uraian
2. **Penilaian Keterampilan:** berupa penilaian portofolio dan proyek.

 Class :
 Direction

1. Write down your name and class on the appropriate place.
2. This test is used for research only.
3. Choose the best answer for the questions.
4. The time given is 45 minutes.
5. The test consists of 25 of items.
6. Thank you so much for the participation.

Komodo

Komodo dragons are the (1) lizards in the world. Some people say it is a dragon and (2) say that the Komodo dragon is one of the ancient animals that have survived to this day. The dragon's (3) home is Komodo Island, Indonesia.

Komodo dragons grow to a maximum length of 3 meters and weigh 70-80 kilograms. Komodo dragons are venomous lizards that hunt other animals such as birds and mammals. Despite only having one ear and poor eyesight, using his tongue and smell he can find the carcass in a radius of 9.5 km. Komodo dragons think (4) the same as animals in general, therefore humans are prohibited from approaching because the Komodo dragon is a (5) animal that can attack and kill humans if there is no other food to eat.

1. What is the correct for answer of number 1?
 - a. Larger
 - b. Largest
 - c. Largely
 - d. Largeness
2. What is the correct for answer of the number 2?
 - a. Sciential
 - b. Science
 - c. Scientist
